ELECTIVE SURGERY MONTHLY UPDATE REPORT 1 September 2002

*Based on data supplied by elective surgery reporting hospitals
via the Elective Admissions Module (EAM)*

Prepared by the Surgical Access Service

14/09/2005

CENSUS DATA

The number of patients on the waiting list at elective surgery reporting hospitals

1. Time waiting for elective surgery at census date - Summary
2. Percentage 'long waits' by urgency category
3. Urgency category by days waiting as at census date
4. Number of patients waiting for elective surgery by urgency category 2001/2002 and 2002/2003
5. Number of patients waiting for elective surgery by surgical specialty (all categories)

Notes

Census data provides an overview of the number of patients waiting for elective surgery at a particular date. This information is usually collected on the first working day of each month.

Category 1 patients are considered to have waited a clinically inappropriate amount of time if they have been on the waiting list greater than 30 days. Patients who have waited longer than 30 days are referred to as 'long wait' patients.

Similarly, Category 2 patients who have waited longer than 90 days and Category 3 patients who have waited longer than 365 days are considered 'long wait' patients.

The attached tables and graphs provide an overview of the total number of patients on the waiting list, the number of patients on the waiting list in 2002/2003 compared to 2001/2002 and the number of patients waiting for specific surgical specialties.

ELECTIVE SURGERY REPORTING HOSPITALS: NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY URGENCY CATEGORY 2001-2002 AND 2002-2003

Source: Elective Admissions Module Report 3

ELECTIVE SURGERY REPORTING HOSPITALS NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY SURGICAL SPECIALTY (ALL CATEGORIES)

Source: Elective Admissions Module Report 3

THROUGHPUT DATA

The number of elective surgery additions to the waiting list, admissions and removals from the waiting list.

1. Elective Surgery Admissions (all categories)
2. Net additions by surgical specialty
3. Net additions 2001/2002 and 2002/2003

Notes

Throughput data refers to the number of patients treated from the waiting list during a particular period. It refers to additions, admissions and removals from the elective surgery waiting list during the period. This information is usually reported for the previous month. This data is provided by each of the elective surgery reporting hospitals.

Patients can be added to the waiting list, admitted from the waiting list or removed from the waiting list for reasons other than admission. Analysis of waiting list dynamics includes the net result of additions, admissions and removals for the month.

Net additions provide a measure of the number of patients being added to the list (additions) versus those who are taken off the list (via admission or removal). If hospitals report that more patients are taken off the list (due to admission or removal) than added, hospitals are maintaining or even reducing the size of the waiting list.

The attached tables provide information about the number of elective surgery admissions over the past year and the net additions for each reporting hospital at surgical specialty level.

It should be noted that elective surgery admissions reported via the Elective Admissions System should be considered preliminary until final activity data is available from the Queensland Hospital Admitted Patient Data Collection.

Prepared by the Surgical Access Service

Note: Net Additions = Additions - (Admissions+Removals)

Elective surgery admissions as reported via the Elective Admissions System are indicative admissions only. The QHAPDC determines final activity rates.

ELECTIVE SURGERY REPORTING HOSPITALS
ALL CATEGORIES NET ADDITIONS 2001/2002 AND 2002/2003

PRIVATE ELECTIVE SURGERY ADMISSIONS

The proportion of private (or 'intermediate') elective surgery admissions.

1. Proportion of private elective surgery patients admitted by urgency category.

Notes

Public and private (or intermediate) elective surgery patients are treated in the elective surgery reporting hospitals.

The attached tables identify the proportion of private patients that have been admitted in each hospital over the last four quarters.

Prepared by the Surgical Access Service

14/09/2005

FOREWORD

Secret and Confidential

The Surgical Access Service Throughput and Census Report is collated from information received from the 32 Queensland Elective Surgery Reporting Hospitals through the Elective Admissions Module. The report demonstrates the performance of Hospitals against agreed benchmarks relating to the reduction of 'long wait' Category One and Category Two patients.

Information provided in the report includes a history of overall performance by facility by month for both census and throughput information and a summary by Speciality for the current month. A graph detailing both the throughput and 'long wait' percentages is also displayed.

This report should be read in conjunction with the Elective Surgery Monthly Update Report. It should be noted that final throughput levels are determined by the QHAPDC through the Data Services Unit.

Secret and Confidential

1. WAITING LIST INFORMATION

Preliminary census information for the elective surgery hospitals for 1 September 2002 shows:

- Category One - 7.7% 'long waits' (cf. 11.2 % at 1 August 2002)
- Category Two - 16.0% 'long waits' (cf. 15.6% at 1 August 2002)
- Category Three - 37.4% 'long waits' (cf. 37.4% at 1 August 2002)

The **total number** of patients on the waiting lists at the reporting hospitals increased from 37,920 at 1 August 2002 to 38,267 at 1 September 2002 (347 patients).

Reporting Date	Category One		Category Two		Category Three		Total
	Total	% 'long waits'	Total	% 'long waits'	Total	% 'long waits'

1 Jan 2001	1,522	4.6%	10,675	11.9%	27,291	35.4%	39,488
1 Apr 2001	1,833	4.5%	11,003	11.3%	26,847	36.9%	39,683
1 Jul 2001	2,023	4.5%	11,022	14.1%	26,258	38.3%	39,303
1 Sep 2001	2,017	6.0%	10,762	14.1%	26,028	37.5%	38,807
1 Oct 2001	1,979	4.5%	10,783	12.6%	25,593	37.2%	38,355
1 Jan 2002	1,557	4.4%	10,961	13.2%	25,106	37.9%	37,624
1 Apr 2002	2,151	3.3%	11,343	13.5%	24,179	38.8%	37,673
1 Jul 2002	2,496	3.4%	11,993	10.6%	23,494	37.6%	37,983
1 Sep 2002	2,384	7.7%	11,889	16.0%	23,994	37.4%	38,267

The number of 'long wait' **Category 1s** decreased by 75 patients from 258 (11.2%) at 1 August 2002 to 183 (7.7%) at 1 September 2002.

The number of 'long wait' **Category 2s** increased by 76 patients from 1,822 (15.6%) at 1 August 2002 to 1,898 (16.0%) at 1 September 2002.

The number of 'long wait' **Category 3s** increased by 28 patients from 8,936 (37.4%) at 1 August 2002 to 8,964 (37.4%) at 1 September 2002.

2. SPECIALTIES

The **specialties** with the largest **number of patients** waiting at 1 September 2002 were:

- General Surgery – 9,243 (compared with 8,884 at 1 September 2001)
- Orthopaedic Surgery – 7,991 (compared with 8,292 at 1 September 2001)
- ENT Surgery - 4,691 (compared with 5,409 at 1 September 2001)
- Ophthalmology - 4,119 (compared with 4,182 at 1 September 2001)

The specialties with the largest **proportion of Category 2 'long wait' patients** at 1 September 2002 were:

- Neurosurgery – 31.1% (68 'long wait' patients) (33.0% or 71 patients at 1 September 2001)
- Urology – 25.9% (280 'long wait' patients) (19.4% or 184 patients at 1 September 2001)
- Orthopaedic Surgery – 21.0% (604 'long wait' patients) (20.2% or 577 patients at 1 September 2001)
- Vascular Surgery – 21.6% (36 'long wait' patients) (41.4% or 125 patients at 1 September 2001)

Specialty	Total Waiting All Categories	Total Number Category 2	Total Number 'Long Wait' Category 2	Percent 'Long Wait' Category 2
Cardio-Thoracic Surgery	429	251	20	8.0%
ENT Surgery	4,691	765	86	11.2%
General Surgery	9,243	3,324	518	15.6%
Gynaecology	3,740	1,494	143	9.6%
Neurosurgery	471	219	68	31.1%
Ophthalmology	4,119	394	35	8.9%
Orthopaedic Surgery	7,991	2,873	604	21.0%
Other	1,056	453	1	0.2%
Plastic & Reconstructive Surg	2,733	868	107	12.3%
Urology	2,812	1,081	280	25.9%
Vascular Surgery	982	167	36	21.6%
Total	38,267	11,889	1,898	16.0%

3. THROUGHPUT

Overall **elective surgery throughput** (Category One, Two and Three) has increased from 8,546 elective surgery admissions in July 2002 to 9,656 in August 2002 (cf. 10,295 in August 2001). Overall elective surgery throughput for the 2002/2003 financial year compared with previous financial years is included in the following table. Throughput for the 2002/2003 financial year is **down by 10.3%** (-2,086 admissions) on the throughput recorded for 2001/2002 and **down by 6.5%** (-1,265 admissions) on the throughput recorded for 2000/2001.

	1997/1998	1998/1999	1999/2000	2000/2001	2001/2002	2002/2003
Private	4,192	4,186	4,012	3,430	3,271	2,736
Public	15,070	16,954	16,680	16,037	17,017	15,466
Total	19,262	21,140	20,692	19,467	20,288	18,202

Note: Elective admissions data reported via the Elective Admissions Module (EAM) should be considered preliminary.

EAM cannot provide weighted separations. The Queensland Health Admitted Patient Data Collection (QHAPDC) provides final weighted separation data.

4. PRIVATE PATIENTS TREATED

Comparison of the proportion of **private elective surgery patients** admitted during the September Quarter 2002/2003 (July/August) with the same period of the September Quarter 1998/1999, 1999/2000 and 2000/2001 is as follows:

	Category One	Category Two	Category Three	All Categories
1 st Quarter 1997/1998	20.0%	26.0%	18.2%	21.8%
1 st Quarter 1998/1999	8.2%	28.6%	17.5%	19.8%
1 st Quarter 1999/2000	7.1%	26.7%	18.9%	19.4%
1 st Quarter 2000/2001	7.4%	24.7%	16.6%	17.6%
1 st Quarter 2001/2002	8.4%	22.6%	13.5%	16.1%
1 st Quarter 2002/2003	7.4%	21.1%	17.9%	15.0%

*The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category one or two patients greater than 5% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only.

The QHAPDC determines final activity rates.

The impact of the industrial action since June 2002 continues to influence the elective surgery waiting lists of particular hospitals.

Gold Coast Hospital has reported a slight decrease the number and proportion of 'long wait' Category 1 and 2 patients compared to 1 August 2002. Elective surgery throughput for August 2002 was some 278 admissions (80.5%) more than that reported in July 2002 and 105 admissions (20.3%) more than August 2001.

Princess Alexandra Hospital continues to actively manage the waiting list despite the fact that elective surgery throughput for August 2002 was 109 (8.7%) admissions less than that reported for August 2001.

The **Nambour Hospital** waiting list situation continues to deteriorate with the District Manager reporting little elective surgery other than Category 1 being performed. The number of 'long wait' Category 2s is now more than 3 times that reported by Princess Alexandra Hospital. Elective surgery throughput for August 2002 was some 142 admissions (35.5%) less than that reported in July 2002.

Royal Brisbane Hospital recorded a decrease in the number and proportion of Category 1 'long waits' at 1 September 2002, although the figures are still unacceptably high. 'Long wait' Category 2s have increased further. Throughput in August 2002 (1,228) almost matched that reported in August 2001 (1,271).

Mackay Hospital reported an increase in the number and proportion of 'long wait' Category 2 patients during August. In the first 2 months of 2002/03, Mackay reported throughput of 153 (-36.7%) less than that reported for the same period last year.

The Townsville Hospital reported a decrease in the number and proportion of Category 2 'long waits' at 1 September 2002. Throughput in August 2002 (381) almost matched that reported in August 2001 (386).

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category three patients greater than 30% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

Note 3: The Royal Womens Hospital data is now reported under the Royal Brisbane Hospital.

Note 4: The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

*Note that due to a temporary error caused by the 1 July 2002 HBCIS software upgrade, data on the proportion of patients admitted in/out time is unavailable for the current month. Business Applications Services Unit is attempting to resolve this problem with iSoft.

ELECTIVE SURGERY MONTHLY UPDATE REPORT 1 September 2003

*Based on data supplied by elective surgery reporting hospitals
via the Elective Admissions Module (EAM)*

Prepared by the Surgical Access Service
13/09/2005

CENSUS DATA

The number of patients on the waiting list at elective surgery reporting hospitals

1. Time waiting for elective surgery at census date - Summary
2. Percentage 'long waits' by urgency category
3. Urgency category by days waiting as at census date
4. Number of patients waiting for elective surgery by urgency category 2002/2003 and 2003/2004
5. Number of patients waiting for elective surgery by surgical specialty (all categories)

Notes

Census data provides an overview of the number of patients waiting for elective surgery at a particular date. This information is usually collected on the first working day of each month.

Category 1 patients are considered to have waited a clinically inappropriate amount of time if they have been on the waiting list greater than 30 days. Patients who have waited longer than 30 days are referred to as 'long wait' patients.

Similarly, Category 2 patients who have waited longer than 90 days and Category 3 patients who have waited longer than 365 days are considered 'long wait' patients.

The attached tables and graphs provide an overview of the total number of patients on the waiting list, the number of patients on the waiting list in 2003/2004 compared to 2002/2003 and the number of patients waiting for specific surgical specialties.

Prepared by the Surgical Access Service

ELECTIVE SURGERY MONTHLY UPDATE REPORT 1 November 2004

*Based on data supplied by elective surgery reporting hospitals
via the Elective Admissions Module (EAM)*

Prepared by Health Systems Development

13/09/2005

CENSUS DATA

The number of patients on the waiting list at elective surgery reporting hospitals

1. Time waiting for elective surgery at census date - Summary
2. Percentage 'long waits' by urgency category
3. Urgency category by days waiting as at census date
4. Number of patients waiting for elective surgery by urgency category 2003/2004 and 2004/2005
5. Number of patients waiting for elective surgery by surgical specialty (all categories)

Notes

Census data provides an overview of the number of patients waiting for elective surgery at a particular date. This information is usually collected on the first working day of each month.

Category 1 patients are considered to have waited a clinically inappropriate amount of time if they have been on the waiting list greater than 30 days. Patients who have waited longer than 30 days are referred to as 'long wait' patients.

Similarly, Category 2 patients who have waited longer than 90 days and Category 3 patients who have waited longer than 365 days are considered 'long wait' patients.

The attached tables and graphs provide an overview of the total number of patients on the waiting list, the number of patients on the waiting list in 2004/2005 compared to 2003/2004 and the number of patients waiting for specific surgical specialties.

ELECTIVE SURGERY REPORTING HOSPITALS NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY SURGICAL SPECIALTY (ALL CATEGORIES)

Source: Elective Admissions Module Report 3

THROUGHPUT DATA

The number of elective surgery additions to the waiting list, admissions and removals from the waiting list.

1. Elective Surgery Admissions (all categories)
2. Net additions by surgical specialty
3. Net additions 2003/2004 and 2004/2005

Notes

Throughput data refers to the number of patients treated from the waiting list during a particular period. It refers to additions, admissions and removals from the elective surgery waiting list during the period. This information is usually reported for the previous month. This data is provided by each of the elective surgery reporting hospitals.

Patients can be added to the waiting list, admitted from the waiting list or removed from the waiting list for reasons other than admission. Analysis of waiting list dynamics includes the net result of additions, admissions and removals for the month.

Net additions provide a measure of the number of patients being added to the list (additions) versus those who are taken off the list (via admission or removal). If hospitals report that more patients are taken off the list (due to admission or removal) than added, hospitals are maintaining or even reducing the size of the waiting list.

The attached tables provide information about the number of elective surgery admissions over the past year and the net additions for each reporting hospital at surgical specialty level.

It should be noted that elective surgery admissions reported via the Elective Admissions System should be considered preliminary until final activity data is available from the Queensland Hospital Admitted Patient Data Collection.

Prepared by Health Systems Development

**ELECTIVE SURGERY REPORTING HOSPITALS
ALL CATEGORIES NET ADDITIONS 2003/2004 AND 2004/2005**

PRIVATE ELECTIVE SURGERY ADMISSIONS

The proportion of private (or 'intermediate') elective surgery admissions.

1. Proportion of private elective surgery patients admitted by urgency category.

Notes

Public and private (or intermediate) elective surgery patients are treated in the elective surgery reporting hospitals.

The attached tables identify the proportion of private patients that have been admitted in each hospital over the last four quarters.

Prepared by Health Systems Development

13/09/2005

FOREWORD

Secret and Confidential

The Surgical Access Service Throughput and Census Report is collated from information received from the 32 Queensland Elective Surgery Reporting Hospitals through the Elective Admissions Module. The report demonstrates the performance of Hospitals against agreed benchmarks relating to the reduction of 'long wait' Category One and Category Two patients.

Information provided in the report includes a history of overall performance by facility by month for both census and throughput information and a summary by Speciality for the current month. A graph detailing both the throughput and 'long wait' percentages is also displayed.

This report should be read in conjunction with the Elective Surgery Monthly Update Report. It should be noted that final throughput levels are determined by the QHAPDC through the Data Services Unit.

Waiting List Snapshot 1 September 2003

Distribution:

Director-General; Minister for Health;
General Manager (Health Services);
Deputy Director-General, Policy and Outcomes;
Zonal Managers – Southern, Central, Northern

Secret and Confidential

Executive Summary

Category 1

Statewide Performance

3.4% (76 patients) at 1 September 2003, which is **down** from 3.6% (79) at 1 August 2003. Compares with 7.7% (183 patients) at 1 September 2002.

Individual Hospitals

The Royal Brisbane Hospital – 8.8% (25 patients) **up** from 6.5% (17 patients) at 1 August 2003.

Primarily due to an increase in 'long wait' Urology patients in Category 1 from 8.9% (8 patients) at 1 August 2003 to 21.7% (18 patients) at 1 September 2003.

Surgical Specialties

'Long wait' Cardio-Thoracic patients decreased from 20.7% (25 patients) at 1 August 2003 to 12.4% (11 patients) at 1 September 2003.

The Prince Charles Hospital - 'long wait' Cardio-thoracic surgery patients were reduced from 21.0% (17 patients) at 1 August to 10.0% (5 patients) at 1 September.

Category 2

Statewide Performance

'Long wait' patients increased from 6.2% (633 patients) at 1 August 2003 to 6.7% (704 patients) at 1 September 2003. The six elective surgery census dates since 1 April 2003 have been the lowest Category 2 'long wait' results recorded since the introduction of the Waiting List Reduction Strategy.

Individual Hospitals

The Princess Alexandra Hospital – 13.5% (148 patients) at 1 September 2003 **up** from 10.2% (112 patients) at 1 August 2003.

Surgical Specialties

'Long wait' Category 2 patients in Cardio-thoracic surgery increased from 17.3% (66 patients) at 1 August to 21.6% (82 patients) at 1 September 2003.

The Prince Charles Hospital - Category Two 'long wait' Cardio-thoracic surgery patients increased from 17.5% (45 patients) at 1 August to 25.9% (67 patients) at 1 September (cf 6.6% or 10 patients at 1 September 2002).

Category 3

Statewide Performance

The proportion of Category 3 'Long wait' patients decreased for the fourth consecutive month. At 1 September there were 37.6% 'long waits' (8,057 patients), compared with 38.0% (8,210) at 1 August and 38.2% (8,519) at 1 July.

Elective Surgery Throughput

Overall **elective surgery throughput** (Category One, Two and Three) has decreased from 10,270 elective surgery admissions in July 2003 to 9,919 in August 2003 (cf. 9,656 in August 2002).

Throughput for the 2003/2004 financial year to date was **up by 1,987 admissions (10.9%)** on the throughput recorded for the same period of 2002/2003 and **down by -99 admissions (-0.5%)** on the same period of 2001/2002.

1. WAITING LIST INFORMATION

Preliminary census information for the elective surgery reporting hospitals for 1 September 2003 shows:

- Category One - 3.4% 'long waits' (cf. 3.6 % at 1 August 2003)
- Category Two - 6.7% 'long waits' (cf. 6.2% at 1 August 2003)
- Category Three - 37.6% 'long waits' (38.0% at 1 August 2003)

The **total number** of patients on the waiting lists at the reporting hospitals increased from 34,036 at 1 September 2003 to 34,160 at 1 September 2003 (124 patients).

The number of 'long wait' **Category 1s** decreased by 3 patients from 79 (3.6%) at 1 August 2003 to 76 (3.4%) at 1 September 2003.

The number of 'long wait' **Category 2s** increased by 71 patients from 633 (6.2%) at 1 August 2003 to 704 (6.7%) at 1 September 2003.

The number of 'long wait' **Category 3s** decreased by 153 patients from 8,210 (38.0%) at 1 August 2003 to 8,057 (37.6%) at 1 September 2003.

2. SPECIALTIES

The specialties with the largest number of patients waiting at 1 September 2003 were:

- General Surgery - 7,448 (compared with 9,243 at 1 September 2002)
- Orthopaedic Surgery - 7,182 (compared with 7,991 at 1 September 2002)
- ENT Surgery - 4,356 (compared with 4,691 at 1 September 2002)
- Ophthalmology - 3,468 (compared with 4,119 at 1 September 2002)

The specialties with the largest proportion of Category 2 'long wait' patients at 1 September 2003 were:

- Cardio-Thoracic Surgery – 21.6% (82 'long wait' patients) (8.0% or 20 patients at 1 September 2002)
- Neurosurgery – 18.2% (31 'long wait' patients) (31.1% or 68 patients at 1 September 2002)
- Other Surgery – 12.9% (72 'long wait' patients) (0.2% or 1 patient at 1 September 2002)
- Vascular Surgery – 9.5% (14 'long wait' patients) (21.6% or 36 patients at 1 September 2002)

Specialty	Total Waiting All Categories	Total Number Category 2	Total Number 'Long Wait' Category 2	Percent 'Long Wait' Category 2
Cardio-Thoracic Surgery	545	380	82	21.6%
ENT Surgery	4,356	732	22	3.0%
General Surgery	7,448	2,608	137	5.3%
Gynaecology	3,352	1,215	15	1.2%
Neurosurgery	375	170	31	18.2%
Ophthalmology	3,468	422	5	1.2%

Urology	2,886	925	82	8.9%
Vascular Surgery	857	147	14	9.5%
Total	34,160	10,439	704	6.7%

3. THROUGHPUT

Overall elective surgery throughput (Category One, Two and Three) has decreased from 10,270 elective surgery admissions in July 2003 to 9,919 in August 2003 (cf. 9,656 in August 2002). Overall elective surgery throughput for the 2003/2004 financial year to date (August) compared with the same period of previous financial years is included in the table below. Throughput for the 2003/2004 financial year to date was up by 1,987 admissions (10.9%) on the throughput recorded for the same period of 2002/2003 and down by -99 admissions (-0.5%) on the same period of 2001/2002.

	1997/1998	1998/1999	1999/2000	2000/2001	2001/2002	2002/2003	2003/2004
Admissions	19,262	21,140	20,692	19,467	20,288	18,202	20,189
2003/04 to prev. years	927	-951	-503	722	-99	1,987	-
% Var. to 2003/04	4.8%	-4.5%	-2.4%	3.7%	-0.5%	10.9%	-

Note: Elective admissions data reported via the Elective Admissions Module (EAM) should be considered preliminary. EAM cannot provide weighted separations. The Queensland Health Admitted Patient Data Collection (QHAPDC) provides final weighted separation data.

4. PRIVATE PATIENTS TREATED

Comparison of the proportion of private elective surgery patients admitted during the September Quarter 2003/2004 to date (July/August) compared with the same period of previous financial years is as follows:

	Category One	Category Two	Category Three	All Categories
1997/1998	20.0%	26.0%	18.2%	21.8%
1998/1999	8.2%	28.6%	17.5%	19.8%
1999/2000	7.1%	26.7%	18.9%	19.4%
2000/2001	7.4%	24.7%	16.6%	17.6%
2001/2002	8.4%	22.6%	13.5%	16.1%
2002/2003	7.4%	21.1%	17.9%	15.0%
2003/2004	4.7%	22.8%	13.5%	14.3%

Note 1: The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 2: The Robina Hospital is now reported under the Gold Coast Hospital.

Note 3: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category one or two patients greater than 5% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 4: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

At **Princess Alexandra Hospital**, the Category 1 'long wait' benchmark was exceeded at 1 September having previously been maintained since 1 January 2003. Category 2 'long waits' increased from 10.2% (112 patients) at 1 August to 13.5% (148 patients) at 1 September 2003 (cf 5.1% or 55 patients at 1 July 2003). The increases have been attributed to Emergency admissions and surgery, bed unavailability, and specialty medical officer deficits.

Nambour Hospital, the Category 1 'long wait' benchmark has been achieved since 1 January 2002. The proportion of Category 2 'long waits' decreased marginally from 1 August (12.7% or 60 patients) to 1 September (12.1% or 61 patients). Category 2 and 3 patients within the General Surgery specialty have been transferred to the Noosa, Caloundra and Gympie Hospitals to expedite surgery.

The Prince Charles Hospital returned below the 5% Category 1 benchmark at 1 September 2003, following a reduction of 'long wait' Cardio-thoracic surgery patients from 21.0% (17 patients) at 1 August to 10.0% (5 patients) at 1 September. Category Two 'long wait' Cardio-thoracic surgery patients increased from 17.5% (45 patients) at 1 August to 25.9% (67 patients) at 1 September (cf 6.6% or 10 patients at 1 September 2002). The increase in 'long wait' Category 2 patient numbers has been attributed to the number of transplant and emergency cases performed during July and August, in addition to an increased number of Category 1 patients requiring priority.

At **Royal Brisbane Hospital**, 'long wait' Category 1 patients increased from 6.5% (17 patients) at 1 August to 8.8% (25 patients) at 1 September 2003. The proportion of 'long wait' Category 2 patients decreased from 10.4% (115 patients) at 1 August to 9.1% (115 patients) at 1 September 2003. The causal factors to the increase in Category 1 'long wait' patients include increased medical and emergency department admissions impacting on the availability of bed numbers for elective surgery and an increased number of patients prioritised as Category 1.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category two patients greater than 5%.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

Note 3: The Royal Womens Hospital is now reported under the Royal Brisbane Hospital.

Note 4: The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 5: The Robina Hospital is now reported under the Gold Coast Hospital.

Elective Surgery Waiting List Snapshot 1 November 2004

Distribution: Director-General; Minister for Health;
Senior Executive Director, Health Services Directorate
Zonal Managers – Southern, Central, Northern

Secret and Confidential

Executive Summary

Category 1

Queensland

3.8% 'long waits' (88 patients) at 1 November 2004, which is increased from 3.3% (77 patients) at 1 October 2004. Compares with 2.4% (54 patients) at 1 November 2003.

Princess Alexandra Hospital

Recorded 10.5% Category 1 'long waits' (34 patients) at 1 November 2004, an increase compared with 6.1% (20 patients) at 1 October 2004. The majority of these 'long waits' are Urology patients.

Royal Brisbane and Women's Hospital

Recorded 8.0% Category 1 'long waits' (26 patients) at 1 November 2004, mostly Vascular patients. This compares with 8.4% 'long waits' (27 patients) at 1 October 2004.

Category 2

Queensland

'Long wait' patients increased to 5.0% (525 patients) at 1 November 2004, up from 4.7% (503 patients) at 1 October 2004. Compares with 8.0% (824 patients) at 1 November 2003.

Gold Coast Hospital

Recorded 6.4% Category 2 'long waits' (64 patients) at 1 November 2004, an increase compared with 4.9% (48 patients) at 1 October 2004.

Princess Alexandra Hospital

Recorded 10.9% Category 2 'long waits' (102 patients) at 1 November 2004, an increase compared with 7.9% (76 patients) at 1 October 2004.

Category 3

Queensland

At 1 November 2004 30.9% of Category 3 patients (5,955) had waited longer than 12 months for surgery, compared with 31.3% (5,935 patients) at 1 October 2004. This compares with 37.4% (7,778 patients) at 1 November 2003.

Elective Surgery Throughput

Queensland

Throughput for October 2004 was 9,804 elective surgery admissions, an increase from the 9,409 elective surgery admissions recorded in September 2004. This compares with 10,916 admissions in October 2003.

1. Waiting List Information

Preliminary census information for the elective surgery reporting hospitals for 1 November 2004 shows:

Category One - 3.8% 'long waits' (cf. 3.3 % at 1 October 2004)

Category Two - 5.0% 'long waits' (cf. 4.7% at 1 October 2004)

Category Three - 30.9% 'long waits' (cf. 31.3% at 1 October 2004)

The **total number** of patients on the waiting lists at the reporting hospitals increased from 31,907 at 1 October 2004 to 32,039 at 1 November 2004 (132 patients).

1 Nov 04	2,294	3.8%	10,472	5.0%	19,273	30.9%	32,039

The number of 'long wait' **Category 1s** increased by 11 patients from 77 (3.3%) at 1 October 2004 to 88 (3.8%) at 1 November 2004.

The number of 'long wait' **Category 2s** increased by 22 patients from 503 (4.7%) at 1 October 2004 to 525 (5.0%) at 1 November 2004.

The number of 'long wait' **Category 3s** increased by 20 patients from 5,935 (31.3%) at 1 October 2004 to 5,955 (30.9%) at 1 November 2004.

2. SPECIALTIES

The **specialties** with the largest **number of patients** waiting at 1 November 2004 were:

- Orthopaedic Surgery – 7,493 (compared with 7,015 at 1 November 2003)
- General Surgery – 7,469 (compared with 7,619 at 1 November 2003)
- ENT Surgery – 3,767 (compared with 4,220 at 1 November 2003)
- Gynaecology – 2,838 (compared with 3,168 at 1 November 2003)

The specialties with the largest **proportion of Category 2 'long waits'** at 1 November 2004 were:

- Neurosurgery – 17.1% (28 'long wait' patients) (22.9% or 40 patients at 1 November 2003)
- Vascular Surgery – 9.0% (14 'long wait' patients) (10.3% or 15 patients at 1 November 2003)
- ENT Surgery – 8.6% (79 'long wait' patients) (5.1% or 37 patients at 1 November 2003)
- Cardio-thoracic Surgery – 8.1% (26 'long wait' patients) (24.5% or 79 patients at 1 November 2003)

Specialty	Total Waiting All Categories	Total Number Category 2	Total Number 'Long Wait' Category 2	Percent 'Long Wait' Category 2
Cardio-Thoracic Surgery	522	321	26	8.1%
ENT Surgery	3,767	922	79	8.6%
General Surgery	7,469	2,960	92	3.1%
Gynaecology	2,838	1,258	13	1.0%
Neurosurgery	345	164	28	17.1%
Ophthalmology	2,822	478	7	1.5%
Orthopaedic Surgery	7,493	2,246	151	6.7%
Other	614	170	1	0.6%
Plastic & Reconstructive Surg	2,716	902	51	5.7%
Urology	2,711	895	63	7.0%
Vascular Surgery	742	156	14	9.0%
Total	32,039	10,472	525	5.0%

3. THROUGHPUT

Overall **elective surgery throughput** (Category One, Two and Three) decreased from 9,409 elective surgery admissions in September 2004 to 9,804 in October 2004 (cf. 10,916 in October 2003). Overall elective surgery throughput for the 2003/2004 financial year to date compared with previous financial years is included in the table below. Throughput for the 2004/2005 financial year to date is **down by 2,492** admissions (-6.0%) on the throughput recorded for 2003/2004 to date and **up by 259** admissions (0.7%) on 2002/2003 to date.

Year to Date	1997/1998	1998/1999	1999/2000	2000/2001	2001/2002	2002/2003	2003/2004	2004/2005
Admissions	38,870	41,703	40,362	38,786	39,367	38,492	41,243	38,751
2004/05 to prev. years	-119	-2,952	-1,611	-35	-616	259	-2,492	-
% Var. to 2004/05	-0.3%	-7.1%	-4.0%	-0.1%	-1.6%	0.7%	-6.0%	-

Note: Elective admissions data reported via the Elective Admissions Module (EAM) should be considered preliminary. EAM cannot provide weighted separations. The Queensland Health Admitted Patient Data Collection (QHAPDC) provides final weighted separation data.

4. PRIVATE PATIENTS TREATED

Comparison of the proportion of **private elective surgery patients** admitted during the 2004/2005 financial year to date compared with previous financial years is as follows:

Year	Category One	Category Two	Category Three	All Categories
1997/1998	16.6%	27.4%	18.0%	21.5%
1998/1999	7.8%	28.0%	19.3%	19.9%
1999/2000	7.1%	26.6%	18.0%	19.2%
2000/2001	7.1%	24.2%	17.8%	17.7%
2001/2002	8.0%	22.4%	13.3%	15.8%
2002/2003	7.2%	21.5%	16.3%	15.0%
2003/2004	4.6%	23.2%	14.8%	14.7%
2004/2005	3.3%	23.4%	14.9%	14.7%

Note 1: The Robina Hospital is now reported under the Gold Coast Hospital.

Note 2: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category one or two patients greater than 5% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 3: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

Princess Alexandra Hospital

Both Category 1 and 2 'long wait' percentages and patient numbers increased significantly during October. The 'long wait' patients are scattered across the specialties, the majority contained in Urology for Category 1 and in Orthopaedics for Category 2. The Elective Surgery Coordinator is reviewing the waiting lists with the specialty directors to identify immediate and long term strategies to reduce 'long wait' patient numbers.

QEII Hospital

Although still over the benchmark, a reduction in the Category 2 'long wait' percentage and actual patient numbers has continued for the third month, specifically in the specialty of Urology.

Royal Brisbane and Women's Hospital

The impact of operating list cancellations due to anaesthetic recruitment difficulties has been realised with the Category 1 and 2 'long wait' percentages remaining over the benchmark at 1 November. Projections have been made that cancellation of operating lists will continue weekly until anaesthetic replacements are appointed.

Royal Children's Hospital

Although both Category 1 and Category 2 'long wait' percentages have been recorded above the benchmark at 1 November, considerable reductions in 'long wait' patient numbers have been achieved during October. The deficit in anaesthetic medical staff continues and has been estimated at 4.0 FTE's. The allocation of theatre sessions are being monitored weekly to ensure that maximum surgery can be accomplished with available levels of staff until the full compliment can be recruited.

The Prince Charles Hospital

As a result of 'long wait' numbers remaining stable and the total number of patients awaiting elective surgery in Category 1 reducing during October, the overall result gave rise to an increase in the percentage. Medical officer conference and annual leave taken during this period has been attributed to the 'long wait' patient numbers remaining constant. The Elective Surgery Coordinator is confident these figures will be rectified in the next month.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category two patients greater than 5%.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

Note 3: The Royal Womens Hospital is now reported under the Royal Brisbane Hospital.

Note 4: The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 5: The Robina Hospital is now reported under the Gold Coast Hospital.

ELECTIVE SURGERY REPORTING HOSPITALS NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY SURGICAL SPECIALTY (ALL CATEGORIES)

Source: Elective Admissions Module Report 3

THROUGHPUT DATA

The number of elective surgery additions to the waiting list, admissions and removals from the waiting list.

1. Elective Surgery Admissions (all categories)
2. Net additions by surgical specialty
3. Net additions 2002/2003 and 2003/2004

Notes

Throughput data refers to the number of patients treated from the waiting list during a particular period. It refers to additions, admissions and removals from the elective surgery waiting list during the period. This information is usually reported for the previous month. This data is provided by each of the elective surgery reporting hospitals.

Patients can be added to the waiting list, admitted from the waiting list or removed from the waiting list for reasons other than admission. Analysis of waiting list dynamics includes the net result of additions, admissions and removals for the month.

Net additions provide a measure of the number of patients being added to the list (additions) versus those who are taken off the list (via admission or removal). If hospitals report that more patients are taken off the list (due to admission or removal) than added, hospitals are maintaining or even reducing the size of the waiting list.

The attached tables provide information about the number of elective surgery admissions over the past year and the net additions for each reporting hospital at surgical specialty level.

It should be noted that elective surgery admissions reported via the Elective Admissions System should be considered preliminary until final activity data is available from the Queensland Hospital Admitted Patient Data Collection.

Prepared by the Surgical Access Service

Note: Net Additions = Additions - (Admissions+Removals)

Elective surgery admissions as reported via the Elective Admissions System are indicative admissions only. The QHAPDC determines final activity rates.

ELECTIVE SURGERY REPORTING HOSPITALS
ALL CATEGORIES NET ADDITIONS 2002/2003 AND 2003/2004

PRIVATE ELECTIVE SURGERY ADMISSIONS

The proportion of private (or 'intermediate') elective surgery admissions.

1. Proportion of private elective surgery patients admitted by urgency category.

Notes

Public and private (or intermediate) elective surgery patients are treated in the elective surgery reporting hospitals.

The attached tables identify the proportion of private patients that have been admitted in each hospital over the last four quarters.

Prepared by the Surgical Access Service

13/09/2005

ELECTIVE SURGERY REPORTING HOSPITALS: PROPORTION OF PRIVATE ELECTIVE SURGERY PATIENTS ADMITTED
