INFORMATION SUBMISSION

COVER SHEET

TITLE

Progress Report on the Waiting List Reduction Strategy; Medical Workforce Issues and Queensland Health Budget Status

MINISTER

Minister for Health and Minister Assisting the Premier on Women's Policy

OBJECTIVE

To inform Cabinet on the progress of the Waiting List Reduction Strategy; Medical Workforce Issues and Queensland Health Budget Status

SUMMARY

The Waiting List Reduction Strategy (the Strategy) is a major commitment of the Government. The Surgical Access Service (SAS) within Queensland Health is responsible for the implementation and reporting of the nine separate elements of the Strategy.

This submission provides an update on the achievements within the Strategy, described under categories of:

- Project Update;
- Progress of Pre-election Commitments; and
- Performance Report.

The target for Category 1 long waits had been maintained as at 1 October 2002 with 4.7% of Category 1 patients (urgent) waiting longer than the recommended time (30 days) for surgery. This is below the State target of 5% and compares with 3.4% at 1 July 2002 and 4.5% at 1 October 2001.

At 1 October 2002, 17.0% of Category 2 patients (semi-urgent) had waited longer than the recommended time (90 days) for surgery. This is above the State target of 5% and compares with 10.6% at 1 July 2002 and 12.6% at 1 October 2001. Individual hospitals have reported that increases in Category 2 waiting times for the September Quarter can be attributed to the industrial action which commence in June 2002, and issues relating to medical indemnity.

At 1 October 2002, 37.2% of Category 3 patients (non-urgent) on the waiting lists of the 31 reporting hospitals had waited longer than one year for surgery. This compares with 37.6% at 1 July 2002 and 37.2% at 1 October 2001.

This document is the property of the Government that created it and is held in trust by the Public Service. It may not be copied or reproduced. For further information contact the Cabinet Secretariat.

Elective surgery throughput for the September Quarter 2002/2003 has decreased by 5.2% compared with the September Quarter of 2001/2002. There were 27,825 admissions recorded in the September Quarter of 2002/2003, a decrease of 1,541 admissions on the throughput recorded for the same Quarter of 2001/2002 (29,366 admissions).

Pre-election commitments have provided an additional \$20 million for extra elective surgery throughput over two years beginning 1 July 2001 and ending 30 June 2003.

Visiting Medical Officer (VMO) vacancies in May were less than in November 2001. Specialties with more than one vacancy include anaesthetics and obstetrics. The decrease in the number of full-time specialist and VMO vacancies has been achieved against a background of a marked increase in the number of full-time specialist and VMO positions since 1998.

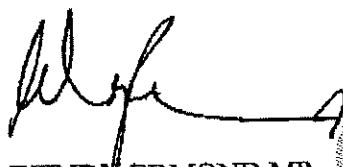

As of October 2002, a budget deficit of \$46M is forecast for Queensland Health Service Districts by the end of the 2002-03 financial year. Queensland Health is undertaking a review of hospitals experiencing the worst forecast deficits and strategies will be developed to reduce, where possible the size of budget deficits. It should also be noted that the forecast deficit does not include the unfunded component of the Enterprise Bargaining Agreements. A submission in relation to the projected end of year financial position is being developed for consideration by CBRC.

RESULTS OF CONSULTATION

- Is there agreement? YES. See paragraph 67 of body of submission.

RECOMMENDATION

That, following consideration, the contents of the submission be noted.

WENDY EDMOND MP
MINISTER FOR HEALTH AND
MINISTER ASSISTING THE PREMIER ON WOMEN'S POLICY

5/12/2002

BODY OF SUBMISSION**OBJECTIVE**

1. To inform Cabinet on the progress of the Waiting List Reduction Strategy; Medical Workforce Issues and Queensland Health Budget Status

BACKGROUND

- Context

2. In July 1998, the Government gave a commitment to significantly expand previous strategies to reduce waiting times in public hospitals in Queensland. The Waiting List Reduction Strategy involves an eight-point plan to cut waiting lists and includes a commitment to:
 - publish the waiting list for each hospital every three months so that money can be channelled to where the real need is;
 - supply general practitioners with quarterly briefings on waiting lists to help them when referring people for surgery;
 - even out waiting lists by moving people in appropriate cases to a hospital where their procedure can be performed more speedily;
 - provide additional funding of \$6.0 million per year to finance extra surgery for complex procedures;
 - work with the specialist colleges to expand training places for new specialists to meet the demand of the next century;
 - use holiday times to keep operating theatres working for the benefit of those waiting for surgery;
 - benchmark waiting times for accident and emergency departments to reduce excessive waits; and
 - increase levels of day surgery across the State to reduce the length of waiting times for elective surgery.
3. A further element was added to the eight-point plan, the collection of waiting times for specialist outpatient appointments to assist in clinical prioritisation for surgery and appointments.
4. In January 2001, the Government's election commitments provided for the enhancement of surgical services in public hospitals, including:
 - injecting an additional \$20 million over two years, into funding for elective surgery so that more people can have their operations faster;

- continuing to work towards a target of 50% of elective surgery performed as day surgery and setting a target of 80% for day of surgery admissions within two years;
- establishing a central elective surgery booking bureau that will be more patient-focused and more responsive to providing services to people where they live; and
- strengthening clinical protocols to ensure appropriate and timely treatment of patients based on clinical need.

• **Previous consideration by Cabinet**

5. Cabinet (Decision Nos. 681, 12 July 1999; 1152, 20 September 1999; 1553, 13 March 2000; 2106, 2 October 2000; 2555, 12 June 2001; 2856, 1 October 2001; 3094, 18 February 2002; and 3158, 12 August 2002) has periodically noted reports on progress of the Waiting List Reduction Strategy.

ISSUES

Project Update

Publication of the Quarterly Elective Surgery Waiting List Report

6. Thirty-one public hospitals contribute information to the *Elective Surgery Waiting List Report* – representing approximately 95% of the elective surgery activity performed in Queensland public hospitals.
7. The open publication of the waiting list data allows referring practitioners and patients access to the elective surgery waiting lists at Queensland Hospitals. This, in turn, allows patients to be referred to those hospitals with shorter waiting lists in particular specialties.

Publishing of Individual Surgeons Waiting Times

8. The Surgical Access Service recently investigated the feasibility of publishing waiting time information by individual doctor and procedure as undertaken by the New South Wales Department of Health.

Timeliness of the Information

9. The data reported in Queensland Health's quarterly publication of elective surgery waiting times is based on census data obtained on the 1st day of the month for the relevant period and is published on the internet on the last day of the same month. In contrast, the NSW Department of Health waiting times contains data that is over six months old (currently reporting data from February 2002 at 4 November 2002). This delay is largely due to the extensive data cleansing and validation issues involved in attempting to address various data quality issues. The benefit of the information is

diminished given the above problems with timeliness, for example in situations where a surgeon no longer operates within the public system.

Data Accuracy

10. Caveats provided on the NSW waiting times website and consultation with project staff reveals acknowledged inaccuracy of waiting times data. In NSW, there are no business rules to state that patients must be placed on the central waiting list system from the time they are first ready for care, as is the case in Queensland. Consultants are able to maintain patient booking details within their private consulting rooms and book patients for surgery close to the time of surgery. The cumulative effect of this issue is that waiting times as published on the site may not be a true reflection of the total waiting time for surgery.

Resistance from Visiting Medical Officers

11. The possibility of Internet publication of elective surgery waiting times by surgeon was raised with the Queensland Health Medical Superintendents Advisory Committee. The committee was concerned that benchmarking in this fashion would further strain current relations with visiting medical officers and impede the recruitment of visiting medical officers from the private sector.
12. Consultation with NSW Department of Health staff identified significant opposition from a number of high profile surgeons, resulting in pressure and eventual approval to have their information 'suppressed' from publication.

Use of the Web Site Information for referral by General Practitioners

13. The Queensland Division of General Practice has advised that only 16% of general practitioners have the ability to access the Internet during patient consultation. With a comparatively limited ability for the majority of general practitioners to access waiting times information during a consultation, the usual practice of telephoning local hospitals will remain the most appropriate means of arranging specialist outpatient consultation. The NSW website states that direct telephone contact is still the most appropriate way to arrange referral of a patient for specialist outpatient consultation. It is unlikely that the availability of elective surgery waiting times by individual surgeon and procedure would result in significant improvement in access to elective surgical services given the limited access to this information during patient consultation.

Impact on Management of Specialist Outpatient Appointment Referrals

14. The potential impact on the ability of hospitals to effectively manage referrals for specialist outpatient clinics is a significant issue to be considered in publishing waiting times by individual surgeons in Queensland.

15. A negative consequence of publishing waiting times by surgeon is that referrals to specific consultants will hinder the effective management of waiting times for specialist outpatient appointments. It should be noted that in NSW specialist outpatient services are no longer provided in public hospitals. It should also be noted that the NSW system allows, if not encourages, referral to individual surgeons regardless of the surgeon's waiting list.

16. Access to elective surgery in Queensland is actively managed to ensure that patients are scheduled and treated in order of clinical urgency as determined by the appropriate surgical specialist. Existing communication processes during the referral of patients by general practitioners to specialist outpatient clinic departments in Queensland public hospitals ensures that patients are assigned to consultants with the shortest waiting times. The provision of average waiting times by individual surgeon and specific procedure is unlikely to improve on the outcomes achieved under existing referral processes and will require significant additional costs for implementation.

Updating of General Practitioners

17. The Queensland Health Internet site has been enhanced to provide information for Patients and for General Practitioners as well as common questions that patients may ask their General Practitioner or Specialist.

Transfer of Patients to Even Out Waiting Lists

18. Elective Surgery Coordinators and Elective Surgery Liaison Officers at reporting hospitals negotiate transfers of patients between hospitals on a case by case basis.

Better Use of Operating Theatres During Holidays

19. Surgical sessions during holiday periods continue to be monitored by the General Manager (Health Services).

Emergency Services Strategy

20. Twenty-one hospitals with an emergency department role delineation of four or greater are participating in the benchmarking program and supply performance data on a monthly basis.
21. Proposed funding allocations for the Emergency Services Strategy in 2002/03 are included in Attachment 1. This includes an additional \$2 million for extra emergency department doctors which has been provided in the 2002/03 budget.

22. Waiting times performance for Queensland emergency departments has been maintained in Australasian Triage Scale (ATS) categories 1 and 2 during the September Quarter 2002, compared to the September Quarter 2001 (see Attachment 2, Table 1). Waiting times in ATS categories 3, 4 and 5 have deteriorated compared to the same Quarter 2001.
23. In relation to Emergency Department waiting times benchmarks, NSW and Victoria's most recently published data shows their performance is better than Queensland's. (see Attachment 2, Table 1).
24. Access block data (waiting time from presentation to admission to an inpatient bed) indicates that Queensland continues to perform significantly better than other States (Attachment 2, Table 2).

Day Surgery and Day of Surgery Admission Performance

25. The day surgery target for elective surgery in Queensland public hospitals has been set at 50%. In addition, a day of surgery admission target of 80% within two years has been established.
26. The day surgery target has been achieved, with 53.4% of cases being undertaken as day procedures in 2001/02 year to March (9 months). The day of surgery admission rate for the same period was 74.3%.
27. Strategies being implemented to achieve further increases in the rate of day surgery and day of surgery admissions, includes:
 - implementation of a benchmarking process that compares day case rates, day of surgery admission rates and pre-operative length of stay across hospitals; and
 - further development of theatre utilisation reporting within Queensland Health to provide comparative information that will identify inefficiencies in utilising operating theatres.

Specialist Outpatient Services

28. A monthly collection of specialist outpatient waiting times at the thirty-one reporting hospitals is continuing. This includes data on the total number of patients awaiting their initial appointment as well as waiting time until the next available appointment.
29. The available data indicates that the number of patients awaiting an initial specialist outpatient appointment increased slightly over the last twelve months (Attachment 2 Table 3).

Progress of Pre-election Commitments

30. The additional \$10m in 2001/2002 has been directed at addressing unmet demand at particular hospitals and in the following surgical specialties: General Surgery, Ophthalmology, Orthopaedics, Urology, Vascular, Ear Nose and Throat, Neurosurgery, Gynaecology and Plastic and Reconstructive Surgery.
31. In 2001/2002, an additional 4,381 elective surgery patients had been treated in Queensland public hospitals compared with last year.

Centralised Elective Surgery Waiting List Management

32. This has been progressed through:
- development of a centralised elective surgery waiting list database;
 - development of audit criteria and audit processes for key indicators of elective surgery waiting list management;
 - strengthening the coordination role of the Elective Surgery Coordinators and Elective Surgery Liaison Officers; and
 - enhanced communication and consultation mechanisms.

Strengthened Clinical Protocols

33. The Government's commitment to strengthen clinical protocols is being progressed through the development of Policy and Procedure Guidelines for Elective Surgery Services, Specialist Outpatients Services and Emergency Department Services.

Day Surgery and Day of Surgery Admission Performance

34. See paragraphs 25 to 27 above.

Performance Report

35. The data is collected to inform Cabinet and is based on census data supplied by the elective surgery reporting hospitals. Copies of the respective elective surgery monthly update reports are then compiled from this census data (Attachment 7). In addition, a waiting list snapshot is produced on a monthly basis for this data (Attachment 8).

Waiting Times

36. The target for Category 1 long waits had been maintained as at 1 October 2002 with 4.7% of Category 1 patients (urgent) waiting longer than the recommended time (30 days) for surgery. This is below the State target of 5% and compares with 3.4% at 1 July 2002 and 4.5% at 1 October 2001.

37. At 1 October 2002, 17.0% of Category 2 patients (semi-urgent) had waited longer than the recommended time (90 days) for surgery. This is above the State target of 5% and compares with 10.6% at 1 July 2002 and 12.6% at 1 October 2001.
38. At 1 October 2002, 37.2% of Category 3 patients (non-urgent) on the waiting lists of the 31 reporting hospitals had waited longer than one year for surgery. This compares with 37.6% at 1 July 2002 and 37.2% at 1 October 2001. There is no target for this category.
39. Attachment 3 provides a graphical representation of the percentage of 'long waits' for Category 1, 2, and 3 elective surgery patients.
40. The following hospitals reported greater than 5% 'long wait' Category 1 patients at 1 October 2002:
- Bundaberg Hospital – 23.4% (15 patients);
 - Gladstone Hospital – 37.5% (3 patients);
 - Gold Coast Hospital – 12.1% (29 patients);
 - Gympie Hospital – 12.5% (1 patient);
 - Mater Adults Hospital – 13.2% (10 patients); and
 - Royal Brisbane Hospital – 6.6% (25 patients).
41. A high proportion of 'long wait' Category 2 patients on the waiting list was reported at 1 October 2002 at:
- Bundaberg Hospital – 35.6% (113 patients);
 - Gold Coast Hospital – 20.7% (291 patients);
 - Gympie Hospital – 40.0% (22 patients);
 - Hervey Bay Hospital – 26.1% (36 patients);
 - Kingaroy Hospital – 62.5% (5 patients);
 - Nambour Hospital – 41.4% (440 patients);
 - Royal Brisbane Hospital – 27.3% (410 patients); and
 - The Townsville Hospital – 24.7% (172 patients).
42. Individual hospitals reported that increases in Category 2 waiting times for the September Quarter can be attributed to the industrial action, which commenced in June 2002. Specifically the industrial action caused bed closures, operating theatre closures, and subsequent rescheduling of surgical operating lists due to nursing staff deficits.
43. Issues relating to medical indemnity have also impacted on Category 2 performance in the September Quarter. For example both the Nambour and Gold Coast Hospital have reported that a significant number of Visiting Medical Officers (VMOs) have been on extended leave or resigned since July 2002.

44. The Nambour Hospital has advised that as VMO Surgeons are the sole providers of services in certain specialities, there have been instances where no elective surgery has been undertaken in these disciplines since July 2002.

45. Significant issues impacting on waiting times and strategies adopted by Queensland Health to address these issues are provided in Attachment 4.

Elective Surgery Throughput

46. Elective surgery throughput for the September Quarter 2002/2003 has decreased by 5.2% compared with the September Quarter of 2001/2002.

47. There were 27,825 admissions recorded in the September Quarter of 2002/2003, a decrease of 1,541 admissions on the throughput recorded for the same Quarter of 2001/2002 (29,366 admissions).

Elective Surgery Specialties

48. The specialties with the largest number of patients waiting at 1 October 2002 were:

- General Surgery - 9,174 (compared with 8,668 at 1 October 2001)
- Orthopaedic Surgery - 7,818 (compared with 8,141 at 1 October 2001)
- ENT Surgery - 4,631 (compared with 5,312 at 1 October 2001)
- Ophthalmology - 4,123 (compared with 4,208 at 1 October 2001).

49. Graphical representation of the number of patients waiting by surgical specialty is contained in Attachment 5 and an analysis of waiting times by specialty is contained in Attachment 6.

Medical Workplace Issues

The Specialist Medical Workforce

50. Medical workforce problems are currently being experienced nationwide. A working party has been formed under the Australian Health Ministers' Advisory Council (AHMAC) to examine issues of specialist training outside of the traditional teaching hospital environment as models for delivery of services increasingly move into the community. AHMAC established the Australian Medical Workforce Advisory Committee (AMWAC) to advise on medical workforce issues, including workforce supply, distribution and future requirements.

Supply of Medical Specialists in Queensland

51. With the introduction of Queensland Health incentives in June 1995, there has been a steady decline over time in full-time specialist vacancies in Queensland public hospitals, as follows:

Full-time Specialist Vacancies

June 1995	125
November 1995	93
March 1996	82
July 1996	62
March 1997	61
March 1999	32
July 1999	45
December 1999	30
January 2001	48
April 2001	39
June 2001	37
November 2001	54
May 2002	35

Visiting Medical Officer Vacancies

March 1999	6
July 1999	7
December 1999	16
January 2001	15
April 2001	35
June 2001	48
November 2001	31
May 2002	10

52. Visiting Medical Officer (VMO) vacancies in May were less than in November 2001. Specialties with more than one vacancy include anaesthetics and obstetrics. The decrease in the number of full-time specialist and VMO vacancies has been achieved against a background of a marked increase in the number of full-time specialist and VMO positions since 1998.

Queensland Health Recruitment Initiatives

53. The strategies detailed below have been successful in reducing the overall numbers of vacancies and in placing specialists in rural areas where long term vacancies have occurred:

- incentives to attract full-time specialists to remote Queensland. Country specialists receive 45% of base salary compared to 35% for metropolitan specialists as Option A under the limited right of private practice arrangements; free accommodation which is currently being upgraded through the capital works program and private use of vehicles;
- changes in the way specialist positions are advertised (eg. total remuneration packages of \$200,000 per annum rather than stating basic salary);

- higher commencement pay rates for visiting specialists in rural areas;
- consultation with the various Colleges and the Commonwealth to extend the number of specialist training places in line with the Australian Medical Workforce Advisory Committee (AMWAC) reports; and
- improvements to enhance the retention of doctors (eg. provision of access to appropriate computer services, provision of increased levels of support staff such as secretaries, increased participation by specialist staff in resource allocation and administrative decision-making, increased professional development opportunities for specialists) in rural areas are being addressed at the District Health Service level.

Training Posts

54. Queensland Health continues to work with the specialist colleges to increase specialist training places in line with AMWAC report recommendations. This is being assisted by the formation of The Medical Workforce Advisory Committee – Queensland (MWAC-Q). The MWAC-Q is currently progressing identified workforce issues.
55. Many of the additional training posts are achieved within existing resources by accreditation of previously unaccredited posts. Additional funding has been provided in 2002/2003 for 10 new registrar posts in medical haematology at PAH and RBH, ENT at RBH, anaesthetics at TPCH and RCH and radiology at Redcliffe, Ipswich, Gold Coast, TPCH and Mater Children's hospitals.

Generalist workforce

56. Queensland Health has undertaken a study of the full-time generalist workforce in Queensland rural hospitals to attempt to explore proposals to improve the training and skills, and the attraction and retention of this group, and to explore the development of an explicit career pathway within Queensland Health. Responses to the issues raised are currently being developed.

Budget Status

57. As of the end of October 2002, a budget deficit of \$46M is forecast for Queensland Health Service Districts by 30 June 2003. Queensland Health is undertaking a review of hospitals experiencing the worst forecast deficits and strategies will be developed in an attempt to reduce the size of these deficits where possible.
58. The Health Service District deficit forecast of \$46M does not include the unfunded component of the Enterprise Bargaining Agreements. The unfunded cost of these Agreements will further undermine the final operating position of the Department.

59. A submission in relation to the projected end of year financial position is being developed for consideration by the Cabinet Budget Review Committee.
60. Capital expenditures at 30 September 2002 are \$57.6 million compared to the published full year budget of \$269.7 million. This year to date position should see an overall full year balanced program.

CONSULTATION

61. Formal consultation on the Waiting List Reduction Strategy has been through existing mechanisms within Queensland Health. These mechanisms include the Medical Superintendents Advisory Committee, the Elective Surgery Coordinators Group, the Emergency Services Specialist Advisory Panel, the Operating Room Management Information System (ORMIS) Strategic Management Group.
62. Consultation has also occurred with the Australasian College for Emergency Medicine, the Queensland Emergency Nurses Association and the Divisions of General Practice.
63. Internally, consultation has occurred with Zonal staff, district managers and key medical and nursing personnel from the participating hospitals on the approach to enhancing emergency, outpatient and surgical services including theatre utilisation. Such consultation has included feedback in the form of a monthly report to hospitals. In addition, visits to the participating hospitals have been conducted.
64. An Operating Theatre Review Working Party was established to identify impediments to surgical throughput and to implement strategies to improve throughput. A final report has been prepared and implementation plans are being developed.
65. Issues related to the increased number of outpatient referrals have been discussed with representatives of the Queensland Divisions of General Practice.
66. The Department of the Premier and Cabinet was consulted in relation to this submission.

RESULTS OF CONSULTATION

67. Consultation remains a major part of the Waiting List Reduction Strategy and mechanisms as outlined above continue to provide a major support role to the project.

PUBLIC PRESENTATION

Funding Arrangements for Emergency Services Strategy in 2002/03

Improving Emergency Department waiting times and access block are central elements of the Government's Health Policy and Queensland Health Executive directives.

\$5.0 million in recurrent funding was provided from 1999/2000 to improve waiting times and access block as part of the Emergency Services Strategy. Of the \$5.0 million, \$3,383,100 is allocated on a recurrent basis, consisting of:

- \$3,156,000 for emergency medicine specialist and nursing staff positions;
- \$227,100 to support the Principal Zonal Clinical Coordinator positions.

Total funding available for initiatives to improve emergency department waiting times and access block in 2002-2003 is \$1,616,900. Indicative allocations for these non-recurrent funds are:

- i) Emergency Department Enhancement Projects – \$200,000 will be allocated to support emergency department projects aimed at addressing emergency department waiting times.
- ii) Information Systems – \$975,000 will be allocated towards the improvement and maintenance of emergency department information systems across Queensland.
- iii) Departmental Reviews – \$60,000 will be allocated for the purpose of conducting a number of external departmental reviews. These reviews have proven to be extremely useful in identifying areas for process improvements in emergency departments.
- iv) Royal Flying Doctor Service (RFDS) – Funding \$340,000 will be allocated to support 2 Senior Medical Officer (SMO) positions within the Rockhampton RFDS. This is an ongoing arrangement by which these 2 positions are shared between the Rockhampton emergency department and the Rockhampton RFDS.
- v) Emergency Department Best Practice Workshop – \$40,000 will be allocated to support a Statewide Emergency Department Best Practice Workshop in Brisbane. This workshop is aimed at developing state-wide strategies to improve emergency department performance. Participants will include emergency department directors and CNC's, District Managers and Medical Superintendents.

An additional \$2.0m has been allocated to provide an additional 16 medical officers in a total of 5 emergency departments across the State in 2002/2003. After extensive consultation with District Health Services and Zonal Management Units, the General Manager, Health Services approved the following allocations:

- \$380,000 allocated to the Redcliffe/Caboolture Hospitals to employ a total of four additional Principal House Officers (PHO's);
- \$180,000 allocated to the Royal Children's Hospital to employ an additional paediatric emergency specialist (FACEM);
- \$550,000 allocated to the Logan Hospital to employ an additional emergency specialist (FACEM), two registrars and two PHO's;
- \$400,000 allocated to the Gold Coast Hospital to employ two additional registrars and an additional PHO.
- \$490,000 allocated to the Townsville Hospital to employ an additional 2 emergency specialists (FACEM's) and an additional registrar.

Table 1 – Emergency Department Waiting Times by Triage Category

ATS	Treatment Acuity	Target	QLD (a)		NSW (b)	VIC (c)
			Sep Qtr 2001-2002	Sep Qtr 2002-2003*	Year 2000-2001**	Year 2000-2001**
1: Resuscitation	Immediate	100%	100%	99%	100%	100%
2: Emergency	Within 10 Minutes	80%	68%	68%	73%	79%
3: Urgent	Within 30 Minutes	75%	55%	49%	58%	70%
4: Semi-urgent	Within 60 Minutes	70%	57%	48%	62%	-
5: Non-urgent	Within 120 Minutes	70%	78%	75%	86%	-

* July data was not supplied by Bundaberg, Hervey Bay and Rockhampton Hospitals due to industrial action. Last available figures (May 2002) have been substituted for July for these facilities.
 July, August and September data was not supplied by Gold Coast Hospital due to system upgrade technical problems. Last available figures (May 2002) have been substituted for these months.
 September Quarter 2002 data includes Redland Hospital.

** Latest published data available

- (a) Waiting time is measured from presentation to time seen by a doctor.
 (b) Waiting time is measured from triage to time seen by a doctor.
 (c) Waiting time is measured from triage to time seen by a doctor or nurse.

Table 2 – Emergency Department Access Block Comparative Data

	% admitted/transferred within 8 hours of attendance by doctor	% admitted/transferred within 12 hours of presentation
Queensland Sep Qtr 2002-2003*	87%	92%
NSW 2000-2001**	76%	-
Victoria 2000-2001**	-	84%

* July data was not supplied by Bundaberg, Hervey Bay and Rockhampton Hospitals due to industrial action. Last available figures (May 2002) have been substituted for July for these facilities.
 July, August and September data was not supplied by Gold Coast Hospital due to system upgrade technical problems. Last available figures (May 2002) have been substituted for these months.

1 Aug 2002	2,306	11.2%	11,704	15.6%	23,910	37.4%	37,920
1 Sep 2002	2,384	7.7%	11,889	16.0%	23,994	37.4%	38,267
1 Oct 2002	2,275	4.7%	11,760	17.0%	23,737	37.2%	37,772

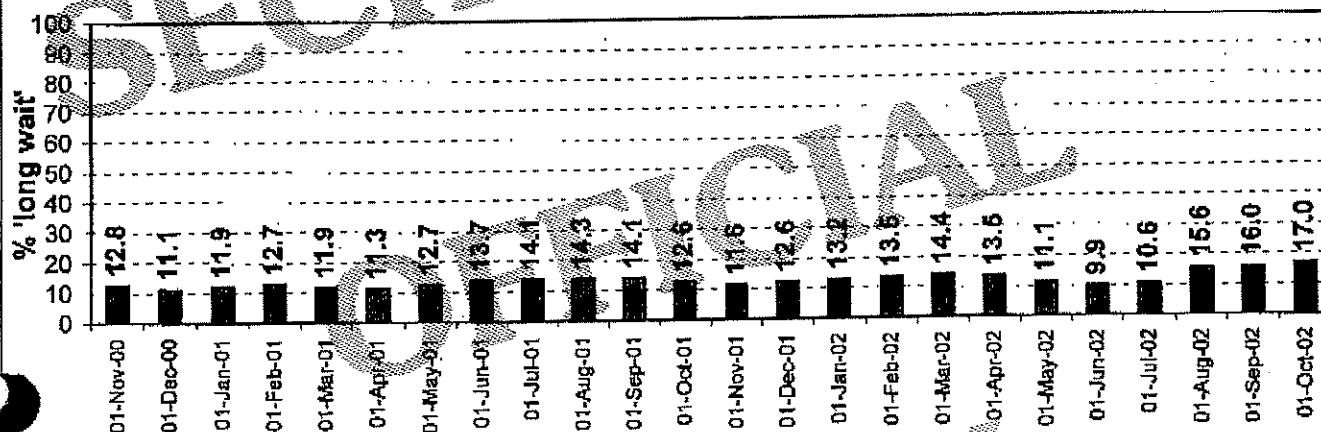

Note: Noosa Hospital reported separately from 1 March 2000 and Robina Hospital reported separately from 1 May 2000.

ELECTIVE SURGERY REPORTING HOSPITALS: PERCENTAGE 'LONG WAITS' BY URGENCY CATEGORY

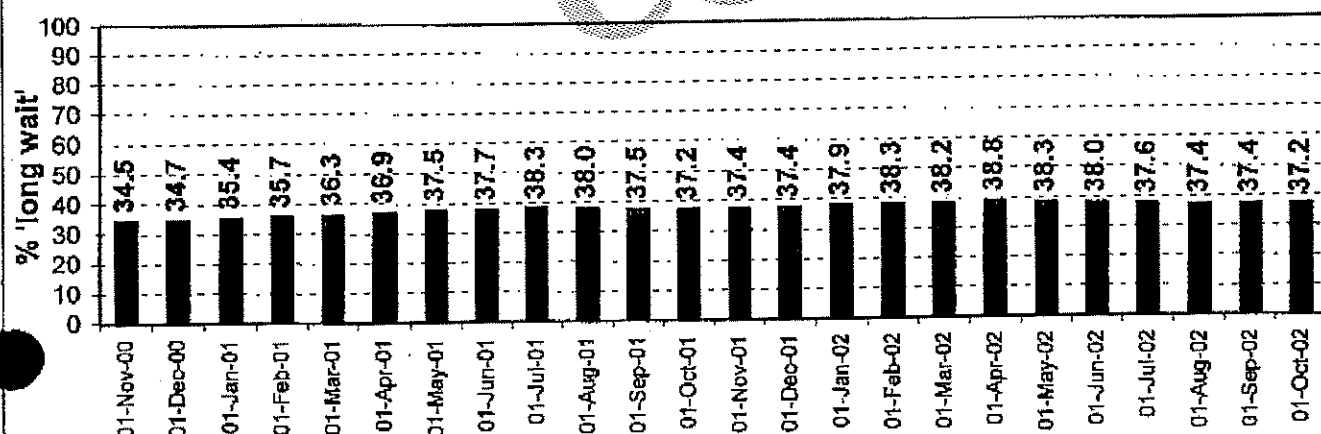

Urgency Category 1

Urgency Category 2

Urgency Category 3

Significant Issues Impacting on Waiting Times for the October Quarter 2002/2003

Gold Coast Hospital

- The impact of the industrial action since June 2002 continues to influence the elective surgery waiting lists, with many of the 'long wait' patients waiting to be re-booked.
- The medical indemnity issues have forced many of the procedural Visiting Medical Officers (VMO's) to take indefinite leave from the Gold Coast Hospital. The surgeons affected include one Gynaecologist, one ENT Surgeon, one Urologist, two Ophthalmologists, and one Plastic Surgeon. Consequently, two VMO's have also resigned.
- Whilst emergency patients take precedence over elective patients, additional theatre sessions are being negotiated with specialty groups to reduce their Category 1 and 2 'long wait' patients.
- Over the quarter, the number of 'long wait' Category 2 patients has significantly decreased. This can be linked to the recent review of categorisation strategies and the subsequent actions that surgeons will adopt when addressing 'long wait' patients.

Mackay Hospital

- Strategies to recruit a new staff Urologist at the Mackay Hospital have been unsuccessful to date. In the interim, negotiation is occurring with Townsville Hospital to determine the best course of action for treating the 'long wait' Category 2 patients in Mackay. In particular, concerns have been raised about the eleven (11) "extra" 'long wait' Category 2 patients, whom have been waiting longer than one year. After the Elective Surgery Liaison Officer conducted a comprehensive audit of the Urology waiting list, an updated list has been forwarded to Townsville Hospital for prioritisation and booking.
- A significant increase in the number of Category 2 'long wait' patients was experienced in August, due to the nursing industrial action commencing in July. Concerted efforts to review, assess, and book patients affected during this time have continued over the quarter. It is anticipated that the 'long wait' Category 2 patients will continue to be reduced, with the exception of Urology.
- Bed shortages are continuing on a daily basis due to nursing staff deficits. However, limited cancellations have occurred due to bed management strategies.

Nambour Hospital

- The Nambour Hospital continues to run at full capacity, with some elective surgery cases being cancelled due to a lack of beds.
 - Since 1st July 2002, the majority of the procedural Visiting Medical Officers employed by the Sunshine Coast Health Service District (SCHSD) have been on indefinite leave due to the medical indemnity crisis. This includes four Gynaecologists, three General Surgeons, three Orthopaedic Surgeons, two ENT Surgeons, two Urologists, two Ophthalmologists, one Plastic Surgeon, and one Vascular Surgeon. As only VMO Surgeons provide ENT, Plastic Surgery, Vascular and Ophthalmology services, there has been no elective surgery undertaken in these disciplines since July.
 - All Category 1 Vascular Surgery patients on the elective surgery waiting list have been referred to Brisbane for treatment.
 - Elective surgery bookings have been restricted to Category 1 and Category 2 day cases.
- Approximately 150 x 3-hour and 4-hour operating sessions have been cancelled during this quarter, due to leave and indemnity issues. Backfilling has not occurred due to a lack of staff (nursing, anaesthetic and surgeons), and a lack of beds.

Princess Alexandra Hospital

- Category 1 and Category 2 Vascular patients continue to be treated at both the Mater Adult and Princess Alexandra campuses. Ipswich Hospital continues to accept Category 3 Vascular patients requiring varicose vein surgery.
 - Transfer of ENT patients from the waiting list at Princess Alexandra Hospital to Logan Hospital has continued. An extensive Specialist Outpatient Clinics audit has been performed, and approximately 260 patients have been transferred to Logan Hospital for their first appointment.
 - 'Long wait' Category 2 patients in Neurosurgery remain a challenge for Princess Alexandra Hospital and strategies are being explored to address this issue. The designated operating session organised in June has still not been initiated to address 'long wait' Category 2 patients.
 - Daily bed occupancy remains between 95% and 110%.
 - The medical indemnity issue has affected the ability of Registrars to utilise empty lists and to undertake simple procedures. In addition, Urology and Hand Surgery Consultants will only perform Category 1 work.
- The vacancy for an Ophthalmologist has been filled for commencement in September, however there has now been a further resignation in this unit.

Royal Brisbane Hospital

- The temporary appointment (ie. six-month trial) of a Level 2 Clinical Nurse has been approved to work within the Elective Surgery Unit - with the first task being the continuance of phone audits and outpatient reviews. Also, approval has been granted to appoint a Level 3 Nurse for the 'Specialist Outpatient and Elective Surgery Waiting List Project' for a period of three months.
- The patients that were cancelled due to the industrial action have mostly been treated, with only 80 of the 463 patients remaining to be prioritised for treatment.
- Currently, 12 beds have been closed due to nursing recruitment issues, with minimal impacts expected on waiting lists.

Townsville Hospital

- The industrial action has caused bed closures, operating theatre closures, and subsequent surgery cancellations due to nursing staff deficits. Negotiation for bed openings have been exacerbated by sick leave being taken by the remaining nursing staff.
- All Category 2 patients were cancelled in July, and since then only day surgery patients have been treated due to staffing deficits. Limitations in surgery types and the increase in patient presentations in the Emergency Department, have caused a blowout in the number of 'long wait' Category 2 patients.
 - The shortfall in Anaesthetists (2.5 FTE) continues to impact on the number of operating sessions on offer.

**ELECTIVE SURGERY REPORTING HOSPITALS
NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY SURGICAL SPECIALTY
(ALL CATEGORIES)**

Cardio-Thoracic Surgery

- At 1 October 2002, there were 20 'long wait' Category 2 patients (7.3%) compared with 22 patients (7.9%) at 1 October 2001 (5 patients or 2.0% at 1 July 2002).
- Elective surgery throughput in Cardio-Thoracic Surgery for the September Quarter 2002/2003 was 898 admissions compared with 947 admissions in the September Quarter 2001/2002 (853 admissions in the June Quarter 2001/2002).

ENT Surgery

- At 1 October 2002, there were 126 'long wait' Category 2 patients (16.4%) compared with 60 patients (9.1%) at 1 October 2001 (75 patients or 10.6% at 1 July 2002).
- At the Nambour Hospital, the number of 'long wait' Category 2 patients in ENT Surgery increased from 4 (9.8%) at 1 July 2002 to 31 patients (54.4%) at 1 October 2002. This compares with 3 patients (6.8%) at 1 October 2001.
- At the Royal Brisbane Hospital, the number of 'long wait' Category 2 patients in ENT Surgery increased from 30 (32.3%) at 1 July 2002 to 43 patients (40.2%) at 1 October 2002. This compares with 37 patients (33.9%) at 1 October 2001.
- At the Townsville Hospital, the number of 'long wait' Category 2 patients in ENT Surgery increased from 14 (24.1%) at 1 July 2002 to 27 patients (33.8%) at 1 October 2002. This compares with 0 patients (0.0%) at 1 October 2001.
- Elective surgery throughput in ENT Surgery for the September Quarter 2002/2003 was 2,224 admissions compared with 2,202 admissions in the September Quarter 2001/2002 (2,223 admissions in the June Quarter 2001/2002).

General Surgery

- At 1 October 2002, there were 505 'long wait' Category 2 patients (15.8%) compared with 251 patients (9.1%) at 1 October 2001 (333 patients or 10.3% at 1 July 2002).
- At the Nambour Hospital, the number of 'long wait' Category 2 patients in General Surgery increased from 57 (16.9%) at 1 July 2002 to 105 patients (30.6%) at 1 October 2002. This compares with 43 patients (13.6%) at 1 October 2001.
- At the Royal Brisbane Hospital, the number of 'long wait' Category 2 patients in General Surgery increased from 124 (26.2%) at 1 July 2002 to 144 patients (30.8%) at 1 October 2002. This compares with 115 patients (27.7%) at 1 October 2001.
- At the Townsville Hospital, the number of 'long wait' Category 2 patients in General Surgery increased from 38 (22.5%) at 1 July 2002 to 69 patients (40.8%) at 1 October 2002. This compares with 29 patients (15.8%) at 1 October 2001.
- Elective surgery throughput in General Surgery for the September Quarter 2002/2003 was 7,261 admissions compared with 8,114 admissions in the September Quarter 2001/2002 (7,469 admissions in the June Quarter 2001/2002).

Gynaecology

- At 1 October 2002, there were 164 'long wait' Category 2 patients (11.0%) compared with 15 patients (1.2%) at 1 October 2001 (55 patients or 3.5% at 1 July 2002).
- At the Bundaberg Hospital, 'long wait' Category 2 patients in Gynaecology have increased from 4 patients (4.5%) at 1 July 2002 to 37 patients (33.0%) at 1 October 2002. This compares with 0 patients (0.0%) at 1 October 2001.
- At the Townsville Hospital, 'long wait' Category 2 patients in Gynaecology have increased from 11 patients (8.4%) at 1 July 2002 to 30 patients (24.0%) at 1 October 2002. This compares with 5 patients (5.1%) at 1 October 2001.
- Elective surgery throughput in Gynaecology for the September Quarter 2002/2003 was 4,047 admissions compared with 4,506 admissions in the September Quarter 2001/2002 (4,390 admissions in the June Quarter 2001/2002).

Neurosurgery

- At 1 October 2002, there were 87 'long wait' Category 2 patients (37.0%) compared with 68 patients (32.1%) at 1 October 2001 (53 patients or 25.2% at 1 July 2002).
- At the Princess Alexandra Hospital, 'long wait' Category 2 patients in Neurosurgery increased from 30 patients (34.5%) at 1 July 2002 to 47 patients (50.5%) at 1 October 2002. This compares with 38 'long wait' patients (47.5%) at 1 October 2001.
- Elective surgery throughput in Neurosurgery for the September Quarter 2002/2003 was 388 admissions compared with 384 admissions in the September Quarter 2001/2002 (394 admissions in the June Quarter 2001/2002).

Ophthalmology

- At 1 October 2002, there were 28 'long wait' Category 2 patients (6.6%) compared with 41 patients (11.1%) at 1 October 2001 (22 patients or 4.6% at 1 July 2002).
- Elective surgery throughput in Ophthalmology for the September Quarter 2002/2003 was 1,855 admissions compared with 1,854 admissions in the September Quarter 2001/2002 (1,930 admissions in the June Quarter 2001/2002).

Orthopaedic Surgery

- At 1 October 2002, there were 586 'long wait' Category 2 patients (21.0%) compared with 454 patients (16.1%) at 1 October 2001 (430 patients or 15.3% at 1 July 2002).
- At the Nambour Hospital, 'long wait' Category 2 patients in Orthopaedics have increased from 147 patients (36.6%) at 1 July 2002 to 186 patients (45.0%) at 1 October 2002. This compares with 56 patients (16.0%) at 1 October 2001.
- At the Royal Brisbane Hospital, 'long wait' Category 2 patients in Orthopaedics increased from 89 patients (34.6%) at 1 July 2002 to 106 patients (40.8%) at 1 October 2002. This compares with 48 'long wait' patients (27.4%) at 1 October 2001.

- In Orthopaedic Surgery, total throughput for the September Quarter 2002/2003 was 4,587 admissions, compared with 5,504 admissions in the September Quarter 2001/2002 (4,996 admissions in the June Quarter 2001/2002).

Plastic & Reconstructive Surgery

- At 1 October 2002, there were 137 'long wait' Category 2 patients (15.7%) compared with 161 patients (19.3%) at 1 October 2001 (49 patients or 5.5% at 1 July 2002).
- At the Gold Coast Hospital 'long wait' Category 2 patients in Plastic & Reconstructive Surgery have increased from 10 patients (19.2%) at 1 July 2002 to 30 patients (48.4%) at 1 October 2002. This compares with 1 patient (4.8%) at 1 October 2001.
- At the Nambour Hospital 'long wait' Category 2 patients in Plastic & Reconstructive Surgery increased from 6 patients (11.1%) at 1 July 2002 to 43 patients (75.4%) at 1 October 2002. This compares with 25 patients (30.9%) at 1 October 2001.
- Elective surgery throughput in Plastic & Reconstructive Surgery for the September Quarter 2002/2003 was 2,089 admissions compared with 2,008 admissions in the September Quarter 2001/2002 (2,040 admissions in the June Quarter 2001/2002).

Urology

- At 1 October 2002, there were 283 'long wait' Category 2 patients (26.5%) compared with 178 patients (17.1%) at 1 October 2001 (214 patients or 19.7% at 1 July 2002).
- The proportion of 'long wait' Category 2 Urology patients at Mackay Hospital remains high, with 26 patients (100.0%) reported at 1 October 2002. This compares with 36 patients (97.3%) at 1 July 2002 and 21 patients (51.2%) at 1 October 2001.
- At the Redcliffe Hospital 'long wait' Category 2 Urology patients increased from 6 patients (8.2%) at 1 July 2002 to 37 patients (44.0%) at 1 October 2002. This compares with 9 patients (15.8%) at 1 October 2001.
- Elective surgery throughput in Urology for the September Quarter 2002/2003 was 1,862 admissions compared with 2,154 admissions in the September Quarter 2001/2002 (1,988 admissions in the June Quarter 2001/2002).

Vascular Surgery

- At 1 October 2002, there were 57 'long wait' Category 2 patients (29.8%) compared with 113 patients (40.8%) at 1 October 2001 (29 patients or 15.1% at 1 July 2002).
- At the Bundaberg Hospital 'long wait' Category 2 Vascular Surgery patients increased from 4 patients (21.1%) at 1 July 2002 to 16 patients (88.9%) at 1 October 2002. This compares with 0 'long wait' patients (0.0%) at 1 October 2001.
- Elective surgery throughput in Vascular Surgery for the September Quarter 2002/2003 was 539 admissions compared with 648 admissions in the September Quarter 2001/2002 (610 admissions in the June Quarter 2001/2002).

ELECTIVE SURGERY MONTHLY UPDATE REPORT

1 August 2002

*Based on data supplied by elective surgery reporting hospitals
via the Elective Admissions Module (EAM)*

Prepared by the Surgical Access Service
26/11/2002

CENSUS DATA

The number of patients on the waiting list at elective surgery reporting hospitals

1. Time waiting for elective surgery at census date - Summary
2. Percentage 'long waits' by urgency category
3. Urgency category by days waiting as at census date
4. Number of patients waiting for elective surgery by urgency category 2001/2002 and 2002/2003
5. Number of patients waiting for elective surgery by surgical specialty (all categories)

Notes

Census data provides an overview of the number of patients waiting for elective surgery at a particular date. This information is usually collected on the first working day of each month.

Category 1 patients are considered to have waited a clinically inappropriate amount of time if they have been on the waiting list greater than 30 days. Patients who have waited longer than 30 days are referred to as 'long wait' patients.

Similarly, Category 2 patients who have waited longer than 90 days and Category 3 patients who have waited longer than 365 days are considered 'long wait' patients.

The attached tables and graphs provide an overview of the total number of patients on the waiting list, the number of patients on the waiting list in 2002/2003 compared to 2001/2002 and the number of patients waiting for specific surgical specialties.

Prepared by the Surgical Access Service
26/11/2002

Census Report 1

ELECTIVE SURGERY REPORTING HOSPITALS: NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY URGENCY CATEGORY 2001-2002 AND 2002-2003

Source: Elective Admissions Module Report 3

CAB.0007.0001.00398

ELECTIVE SURGERY REPORTING HOSPITALS NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY SURGICAL SPECIALTY (ALL CATEGORIES)

THROUGHPUT DATA

The number of elective surgery additions to the waiting list, admissions and removals from the waiting list.

1. Elective Surgery Admissions (all categories)
2. Net additions by surgical specialty
3. Net additions 2001/2002 and 2002/2003

Notes

Throughput data refers to the number of patients treated from the waiting list during a particular period. It refers to additions, admissions and removals from the elective surgery waiting list during the period. This information is usually reported for the previous month. This data is provided by each of the elective surgery reporting hospitals.

Patients can be added to the waiting list, admitted from the waiting list or removed from the waiting list for reasons other than admission. Analysis of waiting list dynamics includes the net result of additions, admissions and removals for the month.

Net additions provide a measure of the number of patients being added to the list (additions) versus those who are taken off the list (via admission or removal). If hospitals report that more patients are taken off the list (due to admission or removal) than added, hospitals are maintaining or even reducing the size of the waiting list.

The attached tables provide information about the number of elective surgery admissions over the past year and the net additions for each reporting hospital at surgical specialty level.

It should be noted that elective surgery admissions reported via the Elective Admissions System should be considered preliminary until final activity data is available from the Queensland Hospital Admitted Patient Data Collection.

ELECTIVE SURGERY REPORTING HOSPITALS
ALL CATEGORIES NET ADDITIONS 2001/2002 AND 2002/2003

PRIVATE ELECTIVE SURGERY ADMISSIONS

The proportion of private (or 'intermediate') elective surgery admissions.

1. Proportion of private elective surgery patients admitted by urgency category.

Public and private (or intermediate) elective surgery patients are treated in the elective surgery reporting hospitals.

The attached tables identify the proportion of private patients that have been admitted in each hospital over the last four quarters

ELECTIVE SURGERY MONTHLY UPDATE REPORT

1 September 2002

*Based on data supplied by elective surgery reporting hospitals
via the Elective Admissions Module (EAM)*

Prepared by the Surgical Access Service
26/11/2002

CENSUS DATA

The number of patients on the waiting list at elective surgery reporting hospitals

1. Time waiting for elective surgery at census date - Summary
2. Percentage 'long waits' by urgency category
3. Urgency category by days waiting as at census date
4. Number of patients waiting for elective surgery by urgency category 2001/2002 and 2002/2003
5. Number of patients waiting for elective surgery by surgical specialty (all categories)

Census data provides an overview of the number of patients waiting for elective surgery at a particular date. This information is usually collected on the first working day of each month.

Category 1 patients are considered to have waited a clinically inappropriate amount of time if they have been on the waiting list greater than 30 days. Patients who have waited longer than 30 days are referred to as 'long wait' patients.

Similarly, Category 2 patients who have waited longer than 90 days and Category 3 patients who have waited longer than 365 days are considered 'long wait' patients.

The attached tables and graphs provide an overview of the total number of patients on the waiting list, the number of patients on the waiting list in 2002/2003 compared to 2001/2002 and the number of patients waiting for specific surgical specialties.

Prepared by the Surgical Access Service

THROUGHPUT DATA

The number of elective surgery additions to the waiting list, admissions and removals from the waiting list.

1. Elective Surgery Admissions (all categories)
2. Net additions by surgical specialty
3. Net additions 2001/2002 and 2002/2003

Throughput data refers to the number of patients treated from the waiting list during a particular period. It refers to additions, admissions and removals from the elective surgery waiting list during the period. This information is usually reported for the previous month. This data is provided by each of the elective surgery reporting hospitals.

Patients can be added to the waiting list, admitted from the waiting list or removed from the waiting list for reasons other than admission. Analysis of waiting list dynamics includes the net result of additions, admissions and removals for the month.

Net additions provide a measure of the number of patients being added to the list (additions) versus those who are taken off the list (via admission or removal). If hospitals report that more patients are taken off the list (due to admission or removal) than added, hospitals are maintaining or even reducing the size of the waiting list.

The attached tables provide information about the number of elective surgery admissions over the past year and the net additions for each reporting hospital at surgical specialty level.

It should be noted that elective surgery admissions reported via the Elective Admissions System should be considered preliminary until final activity data is available from the Queensland Hospital Admitted Patient Data Collection.

ELECTIVE SURGERY REPORTING HOSPITALS
ALL CATEGORIES NET ADDITIONS 2001/2002 AND 2002/2003

PRIVATE ELECTIVE SURGERY ADMISSIONS

The proportion of private (or 'intermediate') elective surgery admissions.

1. Proportion of private elective surgery patients admitted by urgency category.

Public and private (or intermediate) elective surgery patients are treated in the elective surgery reporting hospitals.

The attached tables identify the proportion of private patients that have been admitted in each hospital over the last four quarters.

CAB.0007.0001.00465

**ELECTIVE SURGERY
MONTHLY UPDATE REPORT
1 October 2002**

*Based on data supplied by elective surgery reporting hospitals
via the Elective Admissions Module (EAM)*

Prepared by the Surgical Access Service
26/11/2002

CENSUS DATA

The number of patients on the waiting list at elective surgery reporting hospitals

1. Time waiting for elective surgery at census date - Summary
2. Percentage 'long waits' by urgency category
3. Urgency category by days waiting as at census date
4. Number of patients waiting for elective surgery by urgency category 2001/2002 and 2002/2003
5. Number of patients waiting for elective surgery by surgical specialty (all categories)

Census data provides an overview of the number of patients waiting for elective surgery at a particular date. This information is usually collected on the first working day of each month.

Category 1 patients are considered to have waited a clinically inappropriate amount of time if they have been on the waiting list greater than 30 days. Patients who have waited longer than 30 days are referred to as 'long wait' patients.

Similarly, Category 2 patients who have waited longer than 90 days and Category 3 patients who have waited longer than 365 days are considered 'long wait' patients.

The attached tables and graphs provide an overview of the total number of patients on the waiting list, the number of patients on the waiting list in 2002/2003 compared to 2001/2002 and the number of patients waiting for specific surgical specialties.

Prepared by the Surgical Access Service

26/11/2002

ELECTIVE SURGERY REPORTING HOSPITALS: NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY URGENCY CATEGORY 2001-2002 AND 2002-2003

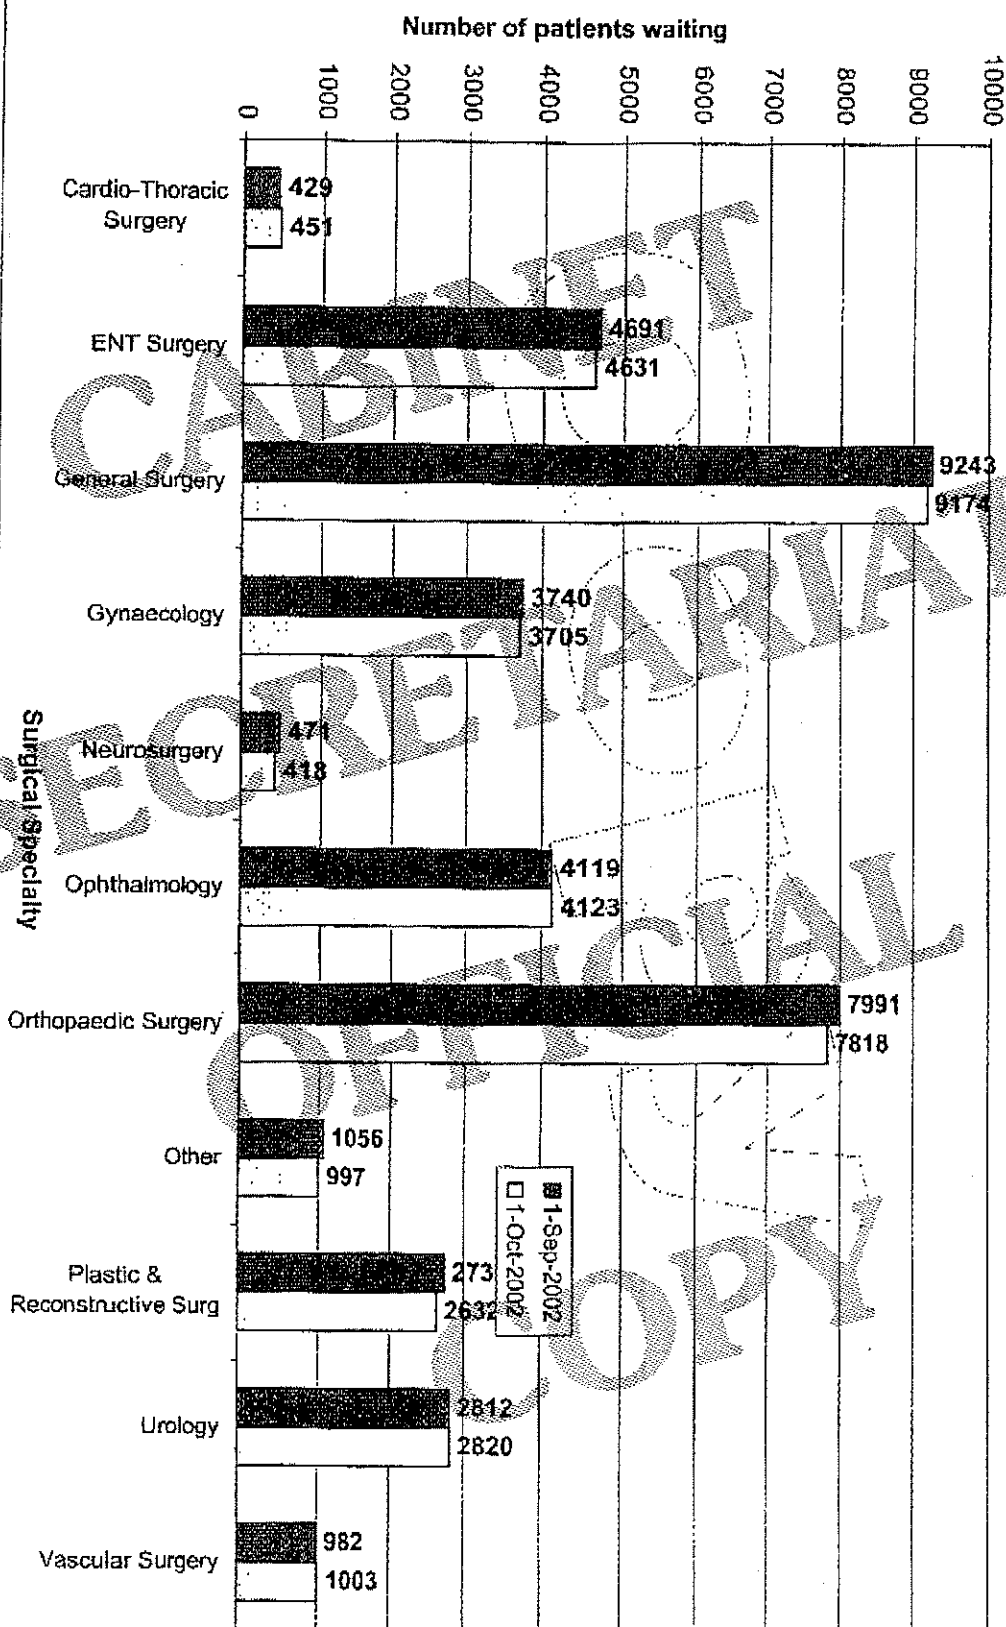

Source: Elective Admissions Module Report 3

CAB.0007.0001.00484

ELECTIVE SURGERY REPORTING HOSPITALS NUMBER OF PATIENTS WAITING FOR ELECTIVE SURGERY BY SURGICAL SPECIALTY (ALL CATEGORIES)

Source: Elective Admissions Module Report 3

THROUGHPUT DATA

The number of elective surgery additions to the waiting list, admissions and removals from the waiting list.

1. Elective Surgery Admissions (all categories)
2. Net additions by surgical specialty
3. Net additions 2001/2002 and 2002/2003

Throughput data refers to the number of patients treated from the waiting list during a particular period. It refers to additions, admissions and removals from the elective surgery waiting list during the period. This information is usually reported for the previous month. This data is provided by each of the elective surgery reporting hospitals.

Patients can be added to the waiting list, admitted from the waiting list or removed from the waiting list for reasons other than admission. Analysis of waiting list dynamics includes the net result of additions, admissions and removals for the month.

Net additions provide a measure of the number of patients being added to the list (additions) versus those who are taken off the list (via admission or removal). If hospitals report that more patients are taken off the list (due to admission or removal) than added, hospitals are maintaining or even reducing the size of the waiting list.

The attached tables provide information about the number of elective surgery admissions over the past year and the net additions for each reporting hospital at surgical specialty level.

It should be noted that elective surgery admissions reported via the Elective Admissions System should be considered preliminary until final activity data is available from the Queensland Hospital Admitted Patient Data Collection.

PRIVATE ELECTIVE SURGERY ADMISSIONS

The proportion of private (or 'intermediate') elective surgery admissions.

1. Proportion of private elective surgery patients admitted by urgency category.

Public and private (or intermediate) elective surgery patients are treated in the elective surgery reporting hospitals.

The attached tables identify the proportion of private patients that have been admitted in each hospital over the last four quarters.

1. WAITING LIST INFORMATION

Preliminary census information for the elective surgery hospitals for 1 August 2002 shows:

- Category One - 11.2% 'long waits' (cf. 3.4 % at 1 July 2002)
- Category Two - 15.6% 'long waits' (cf. 10.6% at 1 July 2002)
- Category Three - 37.4% 'long waits' (cf. 37.6% at 1 July 2002)

The total number of patients on the waiting lists at the reporting hospitals decreased from 37,983 at 1 July 2002 to 37,920 at 1 August 2002 (63 patients).

1 Aug 2001	2,037	5.1%	10,732	14.3%	25,728	38.0%	38,497
1 Oct 2001	1,979	4.5%	10,783	12.6%	25,593	37.2%	38,355
1 Jan 2002	1,557	4.4%	10,961	13.2%	25,106	37.9%	37,624
1 Apr 2002	2,151	3.3%	11,343	13.5%	24,179	38.8%	37,673
1 Jun 2002	2,179	2.7%	11,349	9.9%	23,276	38.0%	36,804
1 Jul 2002	2,496	3.4%	11,993	10.6%	23,494	37.6%	37,983
1 Aug 2002	2,306	11.2%	11,704	15.6%	23,910	37.4%	37,920

The number of 'long wait' Category 1s increased by 173 patients from 85 (3.4%) at 1 July 2002 to 258 (11.2%) at 1 August 2002.

The number of 'long wait' Category 2s increased by 552 patients from 1,270 (10.6%) at 1 July 2002 to 1,822 (15.6%) at 1 August 2002.

The number of 'long wait' Category 3s increased by 104 patients from 8,832 (37.6%) at 1 July 2002 to 8,936 (37.4%) at 1 August 2002.

2. SPECIALTIES

The specialties with the largest number of patients waiting at 1 August 2002 were:

- General Surgery – 8,834 (compared with 8,883 at 1 August 2001)
- Orthopaedic Surgery – 7,945 (compared with 8,238 at 1 August 2001)
- ENT Surgery – 4,665 (compared with 5,359 at 1 August 2001)
- Ophthalmology – 4,199 (compared with 4,246 at 1 August 2001)

The specialties with the largest proportion of Category 2 'long wait' patients at 1 August 2002 were:

- Neurosurgery – 34.0% (73 'long wait' patients) (32.8% or 66 patients at 1 August 2001)
- Urology – 22.3% (249 'long wait' patients) (16.9% or 172 patients at 1 August 2001)
- Orthopaedic Surgery – 20.1% (546 'long wait' patients) (20.3% or 606 patients at 1 August 2001)
- General Surgery – 16.3% (516 'long wait' patients) (9.8% or 269 patients at 1 August 2001)

Specialty	Total Waiting All Categories	Total Number Category 2	Total Number 'Long Wait' Category 2	Percent 'Long Wait' Category 2
Cardio-Thoracic Surgery	390	248	15	6.0%
ENT Surgery	4,665	769	103	13.4%
General Surgery	8,834	3,171	516	16.3%

Neurosurgery	506	215	73	34.0%
Ophthalmology	4,199	410	52	12.7%
Orthopaedic Surgery	7,945	2,721	546	20.1%
Other	1,053	470	12	2.6%
Plastic & Reconstructive Surg	2,824	850	88	10.4%
Urology	2,828	1,119	249	22.3%
Vascular Surgery	975	179	28	15.6%
Total	37,920	11,704	1,822	15.6%

3. THROUGHPUT

Overall elective surgery throughput (Category One, Two and Three) has increased from 8,338 elective surgery admissions in June 2002 to 8,546 in July 2002 (cf. 9,993 in July 2001). Overall elective surgery throughput for the 2001/2002 financial year compared with 2000/2001, 1999/2000 and 1998/1999 is included in the following table. Throughput for the 2001/2002 financial year was up by 4.0% (4,381 admissions) on the throughput recorded for 2000/2001 and down by 1.2% (-1,427 admissions) on the throughput recorded for 1999/2000.

	1997/1998	1998/1999	1999/2000	2000/2001	2001/2002
Private	23,586	23,620	21,572	18,297	17,686
Public	89,932	93,718	94,023	91,490	96,482
Total	113,518	117,338	115,595	109,787	114,168

Note: Elective admissions data reported via the Elective Admissions Module (EAM) should be considered preliminary data. EAM can not provide weighted separations. The Queensland Hospital Admitted Patient Data Collection (QHAPDC) provides final weighted separation data.

4. PRIVATE PATIENTS TREATED

Comparison of the proportion of private elective surgery patients admitted during the September Quarter 2002/2003 (July) with the same period of the September Quarter 1998/1999, 1999/2000 and 2000/2001 is as follows:

	Category One	Category Two	Category Three	All Categories
1 st Quarter 1997/1998	20.2%	26.9%	17.5%	22.0%
1 st Quarter 1998/1999	8.8%	28.8%	16.9%	19.8%
1 st Quarter 1999/2000	6.9%	28.0%	20.5%	20.2%
1 st Quarter 2000/2001	7.8%	24.5%	18.5%	18.1%
1 st Quarter 2001/2002	8.9%	21.5%	13.7%	15.9%
1 st Quarter 2002/2003	7.9%	19.1%	15.4%	13.4%

*The Kew Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category one or two patients greater than 5% or a decrease in elective surgery throughput of greater than 1% for the same period of the previous financial year.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only.

The QHAPDC determines final activity rates.

The industrial action in July has impacted on elective surgery throughput and the ability of hospitals to manage waiting lists. The following comments are provided in this light.

Gold Coast Hospital has recorded an increase in the number and proportion of Category 1 and 2 'long wait' patients from 1 July 2002. Elective surgery throughput for July 2002 was some 258 admissions (42.8%) less than May 2002 and 187 admissions (35.2%) lower than July 2001.

Princess Alexandra Hospital exceeded the Category 1 benchmark (10.7%) for the first time since 1 April 2002.

Nambour Hospital maintained Category 1 'long waits' below target, but recorded a high proportion of Category 2 'long waits' (39.2%), an increase from 1 July 2002 (28.1%).

Royal Brisbane Hospital recorded a significant increase in the number and proportion of Category 1 'long waits' at 1 August 2002 (137 patients or 24.8%). The number and proportion of 'long wait' Category 2 patients remains high (440 patients or 29.9%).

Mt Isa Hospital has significantly reduced the number of Category 1 'long wait' patients awaiting surgery since 1 April 2002 (15 patients or 41.7%), recording 1 'long wait' Category 1 patient (20.0%) at 1 August 2002. The number and proportion of 'long wait' Category 2 patients has also decreased from 1 April 2002 (82 patients or 56.2%). At 1 August 2002 there were 15 'long wait' Category 2 patients (19.5%).

The Townsville Hospital exceeded the Category 1 'long wait' benchmark at 1 August 2002 (8 patients or 5.8%) for the first time since 1 November 2001.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category three patients greater than 30% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only.

The QHAPDC determines final activity rates.

Note 3: The Royal Womens Hospital data is now reported under the Royal Brisbane Hospital.

Note 4: The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

*Note that due to a temporary error caused by the 1 July 2002 HBCIS software upgrade, data on the proportion of patients admitted in/out time is unavailable for the current month. The problem is being resolved by iSoft.

1. WAITING LIST INFORMATION

Preliminary census information for the elective surgery hospitals for 1 September 2002 shows:

Category One - 7.7% 'long waits' (cf. 11.2 % at 1 August 2002)
 Category Two - 16.0% 'long waits' (cf. 15.6% at 1 August 2002)
 Category Three - 37.4% 'long waits' (cf. 37.4% at 1 August 2002)

The **total number** of patients on the waiting lists at the reporting hospitals increased from 37,920 at 1 August 2002 to 38,267 at 1 September 2002 (347 patients).

Reporting Date	Category One		Category Two		Category Three		Total
	Total	% 'long waits'	Total	% 'long waits'	Total	% 'long waits'

1 Jan 2001	1,522	4.6%	10,675	11.9%	27,291	35.4%	39,488
1 Apr 2001	1,833	4.5%	11,003	11.3%	26,847	36.9%	39,683
1 Jul 2001	2,023	4.5%	11,022	14.1%	26,258	38.3%	39,303
1 Sep 2001	2,017	6.0%	10,762	14.1%	26,028	37.5%	38,807
1 Oct 2001	1,979	4.5%	10,783	12.6%	25,593	37.2%	38,355
1 Jan 2002	1,557	4.4%	10,961	13.2%	25,106	37.9%	37,624
1 Apr 2002	2,151	3.3%	11,343	13.5%	24,179	38.8%	37,673
1 Jul 2002	2,496	3.4%	11,993	10.6%	23,494	37.6%	37,983
1 Sep 2002	2,384	7.7%	11,889	16.0%	23,994	37.4%	38,267

The number of 'long wait' Category 1s decreased by 75 patients from 258 (11.2%) at 1 August 2002 to 183 (7.7%) at 1 September 2002.

The number of 'long wait' Category 2s increased by 76 patients from 1,822 (15.6%) at 1 August 2002 to 1,898 (16.0%) at 1 September 2002.

The number of 'long wait' Category 3s increased by 28 patients from 8,936 (37.4%) at 1 August 2002 to 8,964 (37.4%) at 1 September 2002.

2. SPECIALTIES

The specialties with the largest number of patients waiting at 1 September 2002 were:

- General Surgery – 9,243 (compared with 8,884 at 1 September 2001)
- Orthopaedic Surgery – 7,991 (compared with 8,292 at 1 September 2001)
- ENT Surgery – 4,691 (compared with 5,409 at 1 September 2001)
- Ophthalmology – 4,119 (compared with 4,182 at 1 September 2001)

The specialties with the largest proportion of Category 2 'long wait' patients at 1 September 2002 were:

- Neurosurgery – 31.1% (68 'long wait' patients) (33.0% or 71 patients at 1 September 2001)
- Urology – 25.9% (280 'long wait' patients) (19.4% or 184 patients at 1 September 2001)
- Orthopaedic Surgery – 21.0% (604 'long wait' patients) (20.2% or 577 patients at 1 September 2001)
- Vascular Surgery – 21.6% (36 'long wait' patients) (41.4% or 125 patients at 1 September 2001)

Specialty	Total Waiting All Categories	Total Number Category 2	Total Number 'Long Wait' Category 2	Percent 'Long Wait' Category 2
Cardio-Thoracic Surgery	429	251	20	8.0%
ENT Surgery	4,691	765	86	11.2%
General Surgery	9,243	3,324	518	15.6%
Gynaecology	3,740	1,494	143	9.6%
Neurosurgery	471	219	68	31.1%
Ophthalmology	4,119	194	35	8.9%
Orthopaedic Surgery	7,991	2,873	604	21.0%
Other	1,056	453	1	0.2%
Plastic & Reconstructive Surg	2,733	868	107	12.3%
Urology	2,812	1,081	280	25.9%
Vascular Surgery	982	167	36	21.6%
Total	38,267	11,889	1,898	16.0%

3. THROUGHPUT

Overall elective surgery throughput (Category One, Two and Three) has increased from 8,546 elective surgery admissions in July 2002 to 9,656 in August 2002 (cf. 10,295 in August 2001). Overall elective surgery throughput for the 2002/2003 financial year compared with previous financial years is included in the following table. Throughput for the 2002/2003 financial year is down by 10.3% (-2,086 admissions) on the throughput recorded for 2001/2002 and down by 6.5% (-1,265 admissions) on the throughput recorded for 2000/2001.

	1997/1998	1998/1999	1999/2000	2000/2001	2001/2002	2002/2003
Private	4,192	4,186	4,012	3,430	3,271	2,736
Public	15,070	16,954	16,680	16,037	17,017	15,466
Total	19,262	21,140	20,692	19,467	20,288	18,202

Note: Elective admissions data reported via the Elective Admissions Module (EAM) should be considered preliminary data. EAM can not provide weighted separations. The Queensland Hospital Admitted Patient Data Collection (QHAPDC) provides final weighted separation data.

4. PRIVATE PATIENTS TREATED

Comparison of the proportion of private elective surgery patients admitted during the September Quarter 2002/2003 (July/August) with the same period of the September Quarter 1998/1999, 1999/2000 and 2000/2001 is as follows:

	Category One	Category Two	Category Three	All Categories
1 st Quarter 1997/1998	20.0%	26.0%	18.2%	21.8%
1 st Quarter 1998/1999	8.2%	28.6%	17.5%	19.8%
1 st Quarter 1999/2000	7.1%	26.7%	18.9%	19.4%
1 st Quarter 2000/2001	7.4%	24.7%	16.6%	17.6%
1 st Quarter 2001/2002	8.4%	22.6%	13.5%	16.1%
1 st Quarter 2002/2003	7.4%	21.1%	17.9%	15.0%

*The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category one or two patients greater than 5% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

The impact of the industrial action since June 2002 continues to influence the elective surgery waiting lists of particular hospitals.

Gold Coast Hospital has reported a slight decrease the number and proportion of 'long wait' Category 1 and 2 patients compared to 1 August 2002. Elective surgery throughput for August 2002 was some 278 admissions (80.5%) more than that reported in July 2002 and 105 admissions (20.3%) more than August 2001.

Princess Alexandra Hospital continues to actively manage the waiting list despite the fact that elective surgery throughput for August 2002 was 109 (8.7%) admissions less than that reported for August 2001.

The **Nambour Hospital** waiting list situation continues to deteriorate with the District Manager reporting little elective surgery other than Category 1 being performed. The number of 'long wait' Category 2s is now more than 3 times that reported by Princess Alexandra Hospital. Elective surgery throughput for August 2002 was some 142 admissions (35.5%) less than that reported in July 2002.

Royal Brisbane Hospital recorded a decrease in the number and proportion of Category 1 'long waits' at 1 September 2002, although the figures are still unacceptably high. 'Long wait' Category 2s have increased further. Throughput in August 2002 (1,228) almost matched that reported in August 2001 (1,271).

Mackay Hospital reported an increase in the number and proportion of 'long wait' Category 2 patients during August. In the first 2 months of 2002/03, Mackay reported throughput of 153 (-36.7%) less than that reported for the same period last year.

The Townsville Hospital reported a decrease in the number and proportion of Category 2 'long waits' at 1 September 2002. Throughput in August 2002 (381) almost matched that reported in August 2001 (386).

Note 1: Cells in Red Text indicate that hospital has recorded a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

*Note that due to a temporary error caused by the 1 July 2002 HBCIS software upgrade, data on the proportion of patients admitted in/out time is unavailable for the current month. Business Applications Services Unit is attempting to resolve this problem with iSoft.

1. WAITING LIST INFORMATION

Preliminary census information for the elective surgery hospitals for 1 October 2002 shows:

Category One - 4.7% 'long waits' (cf. 7.7 % at 1 September 2002)
 Category Two - 17.0% 'long waits' (cf. 16.0% at 1 September 2002)
 Category Three - 37.2% 'long waits' (cf. 37.4% at 1 September 2002)

The total number of patients on the waiting lists at the reporting hospitals decreased from 38,267 at 1 September 2002 to 37,772 at 1 October 2002 (-495 patients).

Reporting Date	Category One		Category Two		Category Three		Total
	Total	% 'long waits'	Total	% 'long waits'	Total	% 'long waits'	
1 Jul 1998	1,285	0.9%	9,243	10.6%	25,732	28.8%	36,260
1 Oct 1998	1,441	2.0%	9,960	14.7%	25,538	28.1%	36,939
1 Jan 1999	964	2.3%	10,244	18.4%	26,012	28.1%	37,220
1 Apr 1999	1,392	1.9%	9,953	15.9%	26,895	27.5%	38,240
1 Jul 1999	1,498	1.9%	9,780	8.6%	27,363	27.5%	38,641
1 Oct 1999	1,468	2.9%	9,604	9.9%	27,520	28.6%	38,592
1 Jan 2000	1,165	4.0%	9,967	9.9%	28,591	29.6%	39,723
1 Apr 2000	1,721	2.0%	9,927	9.6%	28,719	30.7%	40,367
1 Jul 2000	1,838	2.7%	10,179	8.3%	28,593	32.4%	40,610
1 Oct 2000	1,749	4.7%	10,615	11.8%	27,650	33.7%	40,014
1 Jan 2001	1,523	4.6%	10,675	11.9%	27,291	35.4%	39,488
1 Apr 2001	1,833	4.5%	11,003	11.3%	26,847	36.9%	39,683
1 Jul 2001	2,023	4.5%	11,022	14.1%	26,258	38.3%	39,303
1 Oct 2001	1,979	4.5%	10,783	12.6%	25,593	37.2%	38,355
1 Jan 2002	1,557	4.4%	10,961	13.2%	25,106	37.9%	37,624
1 Apr 2002	2,151	3.3%	11,343	13.5%	24,179	38.8%	37,673
1 Jul 2002	2,496	3.4%	11,993	10.6%	23,494	37.6%	37,983
1 Oct 2002	2,275	4.7%	11,760	17.0%	23,737	37.2%	37,772

The number of 'long wait' Category 1s decreased by 76 patients from 183 (7.7%) at 1 September 2002 to 107 (4.7%) at 1 October 2002.

The number of 'long wait' Category 2s increased by 98 patients from 1,898 (16.0%) at 1 September 2002 to 1,996 (17.0%) at 1 October 2002.

The number of 'long wait' Category 3s decreased by 123 patients from 8,964 (37.4%) at 1 September 2002 to 8,841 (37.2%) at 1 October 2002.

2. SPECIALTIES

The specialties with the largest number of patients waiting at 1 October 2002 were:

- General Surgery - 9,174 (compared with 8,668 at 1 October 2001)
- Orthopaedic Surgery - 7,818 (compared with 8,141 at 1 October 2001)
- ENT Surgery - 4,631 (compared with 5,312 at 1 October 2001)
- Ophthalmology - 4,123 (compared with 4,208 at 1 October 2001)

The specialties with the largest proportion of Category 2 'long wait' patients at 1 October 2002 were:

- Neurosurgery - 37.0% (87 'long wait' patients) (32.1% or 68 patients at 1 October 2001)
- Vascular Surgery - 29.8% (57 'long wait' patients) (40.8% or 113 patients at 1 October 2001)
- Urology - 26.5% (283 'long wait' patients) (17.1% or 178 patients at 1 October 2001)
- Orthopaedic Surgery - 21.0% (586 'long wait' patients) (16.1% or 454 patients at 1 October 2001)

Specialty	Total Waiting All Categories	Total Number Category 2	Total Number 'Long Wait' Category 2	Percent 'Long Wait' Category 2
Cardio-Thoracic Surgery	451	275	20	7.3%
ENT Surgery	4,631	767	126	16.4%
General Surgery	9,174	3,189	605	19.0%
Gynaecology	3,705	1,492	164	11.0%
Neurosurgery	418	235	87	37.0%
Ophthalmology	4,123	424	28	6.6%
Orthopaedic Surgery	7,818	2,786	586	21.0%
Other	997	460	3	0.7%
Plastic & Reconstructive Surg	2,632	872	137	15.7%
Urology	2,820	1,069	283	26.5%
Vascular Surgery	1,803	191	57	29.8%
Total	37,772	11,760	1,996	17.0%

3. THROUGHPUT

Overall elective surgery throughput (Category One, Two and Three) has decreased from 9,656 elective surgery admissions in August 2002 to 9,623 in September 2002 (cf. 9,078 in September 2001). Overall elective surgery throughput for the 2002/2003 financial year compared with previous financial years is included in the following table. Throughput for the 2002/2003 financial year is down by 5.2% (-1,541 admissions) on the throughput recorded for 2001/2002 and down by 3.0% (-868 admissions) on the throughput recorded for 2000/2001.

	1997/1998	1998/1999	1999/2000	2000/2001	2001/2002	2002/2003
Private	6,206	6,272	5,927	5,015	4,682	4,151
Public	22,558	25,281	24,868	23,678	24,684	23,674
Total	28,764	31,553	30,795	28,693	29,366	27,825

Note: Elective admissions data reported via the Elective Admissions Module (EAM) should be considered preliminary. EAM cannot provide weighted separations. The Queensland Health Admitted Patient Data Collection (QHAPDC) provides final weighted separation data.

4. PRIVATE PATIENTS TREATED

Comparison of the proportion of private elective surgery patients admitted during the September Quarter 2002/2003 (July, August, September) with the September Quarter 1997/1998, 1998/1999, 1999/2000, 2000/2001, and 2001/2002 is as follows:

	Category One	Category Two	Category Three	All Categories
1 st Quarter 1997/1998	17.8%	26.8%	18.2%	21.6%
1 st Quarter 1998/1999	7.8%	28.3%	18.6%	19.9%
1 st Quarter 1999/2000	7.2%	26.7%	18.0%	19.2%
1 st Quarter 2000/2001	7.3%	24.5%	16.5%	17.5%
1 st Quarter 2001/2002	8.2%	22.5%	13.4%	15.9%
1 st Quarter 2002/2003	7.5%	20.9%	16.7%	14.9%

*The ~~Kronos Hospital for Women~~ and the Townsville General Hospital are now reported together as The Townsville Hospital.

Note 1: ~~Cells in Red Text indicate that~~ hospital has recorded a proportion of 'long wait' category one or two patients greater than 5% or a decrease in elective surgery throughput of greater than 5% for the same period of the previous financial year.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only.

The QIP/DOC determines final activity rates.

The impact of the industrial action since June 2002 continues to influence the elective surgery waiting lists of particular hospitals.

At Gold Coast Hospital, emergency procedures continue to take precedence over elective surgery, particularly in Vascular Surgery and Neurosurgery. Comparative benchmarking of categorisation techniques has identified anomalies, for which strategies are being activated. Generally, 'long wait' figures have improved over the quarter.

Mater Adults Hospital has experienced an increase in the number and proportion of 'long wait' Category 1 and 2 patients due to leave taken by Specialists. The waiting list data has not been correlated before submission to the Surgical Access Service due to the Elective Surgery Coordinator being on leave during September/October.

Bundaberg Hospital continues to experience Medical and Anaesthetist staff deficiencies. Elective surgery lists have been reduced to one per day, compounding an increase in both 'long wait' Category 1 and 2 patients.

The Royal Brisbane Hospital is recovering from the recent absence of the Elective Surgery Coordinator and identified anomalies in categorisation techniques. However, all patients affected by the industrial action have now been treated or booked for surgery. Overall, reductions in 'long wait' patients have been achieved in both Categories.

At Mackay Hospital, negotiations are continuing with Townsville Hospital regarding the transfer of 'long wait' Category 2 Urology patients. Bed management and theatre utilisation strategies are in place to overcome 'long wait' issues. A reduction in the number and proportion of 'long wait' figures has been achieved in the past month.

Townsville Hospital has a shortage of anaesthetic and nursing staff, resulting in a significant number of theatre session and bed closures. An increase in emergency procedures has taken precedence over elective surgery procedures.

Note 1: Cells in Red Text indicate that hospital has recorded a proportion of 'long wait' category two patients greater than 5%.

Note 2: Elective surgery admissions as reported via the Elective Admissions Module are indicative admissions only. The QHAPDC determines final activity rates.

Note 3: The Royal Womens Hospital data is now reported under the Royal Brisbane Hospital.

Note 4: The Kirwan Hospital for Women and the Townsville General Hospital are now reported together as The Townsville Hospital.
